Who's Driving Electric Cars Marcello Contestabile, Gil Tal, Thomas Turrentine, 2020-03-17 This book offers a comprehensive yet accessible snapshot of the latest consumer research on the adoption and use of electric vehicles. It discusses the importance of developing a better understanding of consumer behavior in relation to electric vehicles and the advantages that can be gained from the growing number of electric vehicle users who can now be studied directly. In turn, it systematically analyzes the leading markets for electric vehicles in North America, Europe, and Asia. Bringing together the experience and expertise of authoritative researchers and practicing professionals, the book shares a wide range of empirical data obtained at the national level and summarizes the general lessons learned. The last part of the book discusses policy relevant insights, forecasts the future evolution of the field in terms of methods and data availability, and addresses several key questions that policymakers and other stakeholders are currently facing. Electric Vehicles Gianfranco Pistoia, Boryann Liaw, 2018-02-10 This book surveys state of the art research on and developments in lithium ion batteries for hybrid and electric vehicles. It summarizes their features in terms of performance, cost, service life, management, charging facilities, and safety. Vehicle electrification is now commonly accepted as a means of reducing fossil fuels consumption and air pollution. At present, every electric vehicle on the road is powered by a lithium ion battery. Currently, batteries based on lithium ion technology are ranked first in terms of performance, reliability, and safety. Though other systems, e.g., metal air, lithium sulphur, solid state, and aluminium ion, are now being investigated, the lithium ion system is likely to dominate for at least the next decade, which is why several manufacturers, e.g., Toyota, Nissan, and Tesla, are chiefly focusing on this technology. Providing comprehensive information on lithium ion batteries, the book includes contributions by the world's leading experts on Li ion batteries and vehicles. **Energy Research Abstracts**, 1986
