Short answer:

5. Explain in detail why/how washing your hands with soap and water (instead of just water) is effective at killing bacteria, germs, and the coronavirus. In your explanation, you should use many chemistry terms. More is better here.

The soap has a hydrophobic end and a hydrophilic end. The soap molecules become micelles which are soluble in water. The hydrophilic side is suspended in water and the hydrophobic side traps the germs so they can't come in contact with water.
