Comprehensive Guide to Child Psychotherapy and Counseling Christiane Brems,2008-03-19 Christiane Brems an experienced clinician supervisor and educator presents a metatheoretical yet practical guide to working with children ages 3 to 12 years She draws heavily on developmental interpersonal family systems and self psychological schools of thought and integrates the core components of all of these approaches in a clear and concise manner She stresses the need for intensive assessment to precede conceptualization and treatment planning so that treatment techniques are dictated by the needs of each child and family Brems has contoured the third edition to meet the practical needs and expectations of students and practitioners Divided among four sections the chapters follow the logical development of clinicians mirroring the natural flow of work with childrenfrom the practitioners self exploration to learning about special aspects of children such as diversity and development to awareness about the special needs and demands of children as related to environmental legal and ethical issues Brems prepares clinicians to discover their own personal traits that may facilitate or hinder their work with children

She walks child therapists and counselors through the initial stages of intake assessment and conceptualization. The material on assessment instruments is thoroughly updated; discussions refer to the latest versions of instruments and if new instruments emerged that meet one of the purposes deemed essential to child treatment they are included. The text contains case examples each illustrating a specific therapeutic technique.

Assessing Adolescents in Educational, Counseling, and Other Settings Robert D. Hoge, 1999-03-01 Adolescence is a distinct period of development that presents a number of special challenges. This fact has important implications for professionals selecting and administering assessment procedures and interpreting the data they yield yet assessment texts have focused on adults or children and devoted minimal attention to adolescents. This book constitutes the first up to date and practical guide to the effective psychological assessment of adolescents. Throughout the author's emphasis is on standardized instruments. Their use he argues provides more valid information about individuals leads to better treatment or placement decisions and contributes to the more efficient management of organizational resources than does reliance on clinical interviews and judgment alone. *Assessing Adolescents in Educational Counseling and Other Settings* will be welcomed by all those professionally involved in the assessment of adolescents: psychologists, psychiatrists, social workers, child care agency staff and educators as well as by those who must make decisions based on their assessments: school principals, youth court judges and managers of residential treatment facilities among others. Developmental researchers will also find this review of available standardized tools helpful in their work.
