McDonald,2022-01-25 This edited volume brings together a broad range of international science education studies focusing on the interplay of teaching and learning science It recognizes the complexity present in today s education associated with major science related issues faced by society such as climate change diseases and pandemics global conflicts over energy food and water The studies discussed in this volume are focused on presenting different opportunities to teach these convoluted matters in order to find simplicity within the complexity and make it accessible to learners They bring together the challenges of preparing the students of today to become scientifically informed citizens of tomorrow **Educational Leadership in Becoming** Nuraan Davids,Yusef Waghid,2016-08-25 Educational Leadership in Becoming reconsiders educational leadership in its current forms and presents a more plausible form of educational leadership to contend with the complexities currently found in universities and schools Much of the literature in vogue concerning educational leadership ranges from transactional to transformative representations of the concept in relation to educational management and policy curriculum inquiry and pedagogical action The primary aim of this book is to revisit some of the dominant understandings of educational leadership and to offer an extended view of the practice along the lines of potentiality and becoming Davids and Waghid argue that all current forms of educational leadership are insufficient to enact responsible human action particularly when it comes to addressing the combined issues of globalisation and equitable redress and transformation whether in relation to leading schools or universities The primary objective of the book is to draw on the Agambian notion of becoming in order to show that an educational leadership in becoming is better placed to not only address the myriad challenges besetting education but to also enhance the potential of leadership in action The book addresses an international audience by analysing conceptions of transformative leadership and should be read by anyone who is interested in education and educational leadership as well as the impact of neoliberal agendas on education and society It should also appeal to those interested in the philosophy of education *The Frederick Douglass Papers* Frederick Douglass,2023-09-12 The selected correspondence of the great American abolitionist and reformer dating from the immediate post Civil War years This third volume of Frederick Douglass s Correspondence Series exhibits Douglass at the peak of his political influence It chronicles his struggle to persuade the nation to fulfill its promises to the former slaves and all African Americans in the tempestuous years of Reconstruction Douglass s career changed dramatically with the end of the Civil War and the long sought after emancipation of American

slaves the subsequent transformation in his public activities is reflected in his surviving correspondence In these letters from 1866 to 1880 Douglass continued to correspond with leading names in antislavery and other reform movements on both sides of the Atlantic and political figures began to make up an even larger share of his correspondents The Douglass Papers staff located 817 letters for this time period and selected 242 or just under 30 percent of them for publication The remaining 575 letters are summarized in the volume s calendar Resources in Education ,1998 The Wisconsin Agriculturist ,1909
