Governance in Transition Ján Buček,Andrew Ryder,2015-04-15 This book looks at experience in government restructuring and devolution from a variety of national and international perspectives both within the European Union and elsewhere focusing on lessons learned and ways forward Since the 1980s there has been a global trend to give more power to local governments Even in Korea and the United Kingdom the most centralised countries in the OECD local government powers have increased with substantial economic benefits Within the European Union the principle of subsidiarity has enshrined the idea of devolution New member states particularly in central and eastern Europe have significantly created new and self sufficient local and regional governments However this process has been complicated Devolution is not a panacea in its own right and need not lead to economic growth While it can encourage savings through collaboration it can also lead to confused lines of authority and can complicate policy formation and implantation Devolution can strain local budgets forcing local governments to rely on their own sources of finance rather than central government transfers Suburbanisation rural depopulation the growth of some regions and the decline of others have raised new problems

The Politics of Crisis in Europe Mai'a K. Davis Cross, 2017-03-02 The Politics of Crisis in Europe explores the resilience of the European Union in the face of repeated crises perceived to threaten its very existence While it is often observed after the fact that these crises serve as opportunities for integration this is the first critical analysis to suggest that we cannot fully understand the nature and severity of these crises without recognising the role of societal reaction to events and the nature of social narratives about crisis especially those advanced by the media Through a close examination of the 2003 Iraq crisis the 2005 constitutional crisis and the 2010-12 Eurozone crisis this book identifies a pattern across these episodes demonstrating how narratives about crises provide the means to openly air underlying societal tensions that would otherwise remain under the surface impeding further integration **A new genre for television?** Justin Hardy, 2025-05-27

In A New Genre for Television filmmaker Justin Hardy argues the dramatised history documentaries broadcast by British public service channels in the 2000s constituted a distinct television genre Offering a vital distinction between docudramas and drama documentaries Hardy contributes to the field of television history through exclusive interviews with key figures from BBC and Channel 4 many of whom have never been publicly interviewed before and envisions a future model for the portrayal of national histories on screen Women Artists in Paris, 1850-1900 Laurence Madeline,Pauline Willis,2017-01-01 Paris was the epicenter of art during the latter half of the nineteenth century luring artists from around the world with its academies museums salons and galleries Despite the city s cosmopolitanism and its cultural stature Parisian society remained strikingly conservative particularly with respect to gender Nonetheless many women painters chose to work and study in Paris at this time overcoming immense obstacles to access the city s resources Women Artists in Paris 1850 1900 showcases the remarkable artistic production of women during this period of great cultural change revealing the breadth and strength of their creative achievements Guest Curator Laurence Madeline Chief Curator at Mus e d art et d histoire Geneva has selected close to seventy compelling paintings by women of varied nationalities ranging from well known artists such as Berthe Morisot Mary Cassatt and Rosa Bonheur to lesser known figures such as Kitty Kielland Louise Breslau and Anna Ancher

Emerging Approaches for Typing, Detection, Characterization, and Traceback of Escherichia coli, 2nd Edition Pina M. Fratamico,Chitrita DebRoy,David S. Needleman,2018-05-02 Pathogenic Escherichia coli strains cause a large number of diseases in humans including diarrhea hemorrhagic colitis hemolytic uremic syndrome urinary tract infections and neonatal meningitis while in animals they cause diseases such as calf scours and mastitis in cattle post weaning diarrhea and edema disease in pigs and peritonitis and airsacculitis in chickens The different E coli pathotypes are characterized by the presence of specific sets of virulence related genes Therefore it is not surprising that pathogenic E coli constitutes a genetically heterogeneous family of bacteria and they are continuing to evolve Rapid and accurate molecular methods are critically needed to detect and trace pathogenic E coli in food and animals They are also needed for epidemiological investigations to enhance food safety as well as animal and human health and to minimize the size and geographical extent of outbreaks The serotype of E coli strains has traditionally been determined using antisera raised against the 180 different O somatic and 53 H flagellar antigens However there are many problems associated with serotyping including it is labor intensive and time consuming cross reactivity of the antisera with different serogroups occurs antisera are available only in specialized laboratories and many strains are non typeable Molecular serotyping targeting O group specific genes within the E coli O antigen gene clusters and genes that are involved in encoding for the different flagellar types offers an improved approach for determining the E coli O and H groups Furthermore molecular serotyping can be coupled with determination of specific sets of virulence genes carried by the strain offering the possibility to determine O group pathotype and the pathogenic potential simultaneously Sequencing of the O antigen gene clusters of all of the known O

groups of E coli is now complete and the sequences have been deposited in the GenBank database The sequence information has revealed that some E coli serogroups have identical sequences while others have point mutations or insertion sequences and type as different serogroups in serological reactions There are also a number of other ambiguities in serotyping that need to be resolved Furthermore new E coli O groups are being identified Therefore there is an essential need to resolve these issues and to revise the E coli serotype nomenclature based on these findings There are emerging technologies that can potentially be applied for molecular serotyping and detection and characterization of E coli On a related topic the genome sequence of thousands of E coli strains have been deposited in GenBank and this information is revealing unique markers such as CRISPR clustered regularly interspaced short palindromic repeats and virulence gene markers that could be used to identify E coli pathotypes Whole genome sequencing now provides the opportunity to study the role of horizontal gene transfer in the evolution and emergence of pathogenic E coli strains Whole genome sequencing approaches are being investigated for genotyping and outbreak investigation for regulatory and public health needs however there is a need for establishing bioinformatics pipelines able to handle large amounts of data as we move toward the use of genetic approaches for non culture based detection and characterization of E coli and for outbreak investigations *Mathematics and Social*
