The Rebirth of Professional Soccer in America Dennis J. Seese, 2015-03-06 The history of soccer in the United States is far richer and more complex than many people realize. Leagues competed in the U S as far back as the late 1800s and in 1919 Bethlehem Steel became the first American professional soccer team to play in Europe when they toured Sweden. Multiple leagues existed during the early 1900s but after the American Soccer Association folded in 1933 the country did not see a rebirth of professional soccer until 1967. It was a painful hostile revival that saw dueling groups of American sports entrepreneurs fracture into two separate professional leagues: The United Soccer Association (USA) and the National Professional Soccer League (NPSL). The Rebirth of Professional Soccer in America: The Strange Days of the United Soccer Association tells the story of this largely forgotten chapter in the sport's history. The USA and NPSL were ragged misshapen pieces of a puzzle that refused to fit together: two leagues competing directly for fans and revenue. While the USA was a league sanctioned by FIFA but absent from the nation's airwaves, the NPSL was considered an outlaw league by FIFA but it held an exclusive television contract with CBS. This would have been strange enough but the USA league imported entire teams from Great Britain, Italy and South America including Stoke City, Wolverhampton Wanderers, Cagliari Calcio and Bangu. This book recounts soccer riots in Yankee Stadium, teams with dual identities, World Cup winners on the pitch and a cast of characters featuring the likes of Phil Woosnam, Lamar Hunt, Derek Dougan and Gordon Banks. Drawing on meticulous research and interviews, this book reveals the little known story that unfolded on the field, in the boardroom and across the country during this single strange season of professional soccer. Featuring an impressive group of global soccer legends, this book delivers a fascinating piece of soccer history for the growing legions of American soccer supporters as well as for soccer fans around the world.

Political Communication and European Parliamentary Elections in Times of Crisis Ruxandra Boicu, Silvia Branea, Adriana Stefanel, 2016-12-30 This book tackles the 2014 European Parliamentary election as an event, phenomenon and process from an interdisciplinary but coherent perspective. This edited volume includes research by prestigious academics from the former communist countries, all of which have only recently become EU members. The contributors consider whether there is a crisis of Euroscepticism or, for that matter, extremism of any kind in each country discussed. In doing so, the volume seeks to analyse the future of the European Union itself. It will appeal to scholars and graduate students interested in elections and voting behaviour, comparative European politics and political communication.

Empire of the Fund William A. Birdthistle,2016-06-01 Empire of the Fund is an expos and examination of the way we save now With the rise of the 401 k and demise of the pension the United States has embarked upon the richest and riskiest experiment in our financial history Over the next twenty years nearly eighty million baby boomers will retire at a pace of ten thousand per day The hypothesis of our experiment is that millions of ordinary untrained busy citizens can successfully manage trillions of dollars in a financial system dominated by wealthy skilled and powerful financial institutions many of which have a record of treating individual investors shabbily The key tools in our 401 k plans and individual retirement accounts are mutual funds which have ballooned to hold more than 16 trillion But these funds pose dangers to our savings in three ways through structural vulnerabilities that give money managers the incentive to focus on marketing over investing through the very human challenges of managing our savings decades into the future and through the peril of financial professionals behaving badly to our economic harm Though Americans often hear of the importance of low fees in fund investing few are aware of the astonishing panoply of ways that some financial advisers have illegally diverted money out of mutual funds from abetting hedge funds to trade after the legal deadline to inflating the assets on which they are paid a percentage to paying kickbacks for brokers to sell their funds This book will forewarn and forearm Americans by illustrating the structural flaws perverse incentives and litany of scandals that have bedeviled mutual funds And by setting forth a pair of policy solutions to improve Americans financial literacy and bargaining power it will also attempt to safeguard our individual financial destinies and our nation s fiscal strength Eco-efficient Materials for Mitigating Building Cooling Needs F.

Pacheco-Torgal,Joao Labrincha,Luisa F. Cabeza,Claes-Göran Granqvist,2015-02-27 Climate change is one of the most important environmental problems faced by Planet Earth The majority of CO2 emissions come from burning fossil fuels for energy production and improvements in energy efficiency shows the greatest potential for any single strategy to abate global greenhouse gas GHG emissions from the energy sector Energy related emissions account for almost 80% of the EU s total greenhouse gas emissions The building sector is the largest energy user responsible for about 40% of the EU s total final energy consumption In Europe the number of installed air conditioning systems has increased 500% over the last 20 years but in that same period energy cooling needs have increased more than 20 times The increase in energy cooling needs relates to the current higher living and working standards In urban environments with low outdoor air quality the general case this means that in summer time one cannot count on natural ventilation to reduce cooling needs Do not forget the synergistic effect between heat waves and air pollution which means that outdoor air quality is worse in the summer aggravating cooling needs Over the next few years this phenomenon will become much worse because more people will live in cities more than 2 billion by 2050 and global warming will aggravate cooling needs An overview of materials to lessen the

impact of urban heat islands Excellent coverage of building materials to reduce air conditioning needs Innovative products discussed such as Thermo and Electrochromic materials
