**Rethinking the Economics of Land and Housing** Josh Ryan-Collins,Toby Lloyd,Laurie Macfarlane,2017-02-28 Why are house prices in many advanced economies rising faster than incomes Why isn't land and location taught or seen as important in modern economics What is the relationship between the financial system and land In this accessible but provocative guide to the economics of land and housing the authors reveal how many of the key challenges facing modern economies including housing crises financial instability and growing inequalities are intimately tied to the land economy Looking at the ways in which discussions of land have been routinely excluded from both housing policy and economic theory the authors show that in order to tackle these increasingly pressing issues a major rethink by both politicians and economists is required

**Domestic and Foreign Mutual Funds in Mexico** Jasmine Xiao,2015-05-13 This paper utilizes a new dataset of foreign and domestic mutual funds in Mexico to assess their behavior and obtains three new findings First foreign mutual funds are more sensitive to global financial conditions and engage more in herding and positive feedback trading than domestic mutual funds notably during episodes of market stress Second the behavior of foreign funds differs substantially across types of funds bond funds are more sensitive to global factors and engage more in positive feedback trading than equity funds funds sold to retail investors open end funds small funds and regional funds also appear to be less stable sources of capital flows Third there is indicative evidence that foreign funds trading behavior is associated with higher local market volatilities notably in periods of market stress however domestic mutual fund investors played some mitigating role

**Comparing the Performance of Logit and Probit Early Warning Systems for Currency Crises in Emerging Market Economies** Mr.Fabio Comelli,2014-04-17 We compare how logit fixed effects and probit early warning systems EWS predict insample and out of sample currency crises in emerging markets EMs We look at episodes of currency crises that took place in 29 EMs between January 1995 and December 2012 Stronger real GDP growth rates and higher net foreign assets significantly reduce the probability of experiencing a currency crisis while high levels of credit to the private sector increase it We find that the logit and probit EWS out of sample performances are broadly similar and that the EWS performance can be very sensitive both to the size of the estimation sample and to the crisis definition employed For macroeconomic policy purposes we conclude that a currency crisis definition identifying more rather than less crisis episodes should be used even if this may lead to the risk of issuing false alarms

*Tax Policy and the Economy, Volume 30* Jeffrey R. Brown,2016-08-08 The research papers in Volume 30 of Tax Policy and the Economy make significant contributions to the academic literature in public finance and provide important conceptual and empirical input to policy design In the first paper Gerald Carlino and Robert Inman consider whether state level fiscal policies create spillovers for neighboring states and how federal stimulus can internalize these externalities The second paper by Nathan Hendren presents a new framework for evaluating the welfare consequences of tax policy changes and explains how the key parameters needed to implement this framework can be estimated The third paper a collaborative effort by several academic and US Treasury economists documents the dramatic increase in pass through businesses including partnerships and S corporations over the last thirty years It notes that these entities now generate more than half of all US business income The fourth paper examines property tax compliance using a pseudo randomized experiment in Philadelphia in which those who owed taxes received supplemental letters regarding their tax delinquency The research explores what types of communication lead to higher rates of tax payment In the fifth paper Jeffrey Clemens discusses cross program budgetary spillovers of minimum wage regulations Severin Borenstein and Lucas Davis the authors of the sixth paper study the distributional effects of income tax credits for clean energy **Protecting the**

**Global Civilian from Violence** Timo Kivimäki, 2021-05-10 This book reveals why the UN is more successful than unilateral great powers in protecting civilians from violence and focuses on the discourse development and consequences of UN peacekeeping Analysing statistics of state fragility and fatalities of violence it reveals that the UN has managed to save tens of thousands of lives with its peacekeeping a surprising statistic given the media consensus about the UN's powerlessness and inefficiency Using computer assisted discourse analysis of resolutions from the UN Security Council 1993 2019 the book offers data that describe the character and development of UN approach to the protection of civilians from violence It then links the data to the statistics of conflict fatalities and state fragility to reveal by means of qualitative and quantitative analysis when where how and why the UN has been successful at protecting civilians Two reasons for the UN's success are highlighted in the book as being statistically most significant First the organization offers local ownership to peaceful solutions by considering conflicting parties as the primary agents of protection Second the UN approach is much less power oriented than unilateral approaches by the great powers protection for the UN does not mean deterrence or destruction but rather support for local protectors of civilians However strong great power influence on such operations tends to weaken UN's ability to save lives This book will be of much interest to students of humanitarian intervention peacekeeping human rights and International Relations in general
