ousted Bourbon dynasty's claim to the throne continued to plot against King Louis Philippe and his July Monarchy. In early 1832, after failing to launch a coup in Southern France, Legitimists plotted an unsuccessful uprising in the Vendée, a region in Western France that had supported the royalist cause during the French Revolution. The Duchesse de Berry led the rebellion in the hopes of placing her son, the Bourbon heir, on the French throne. The revolt marked the last attempt by the Bourbons to retake the throne by force and helped solidify the end of the Bourbon dynasty. During the cholera outbreak, which also spread throughout France in 1832, lower income areas suffered higher losses to the disease for they were more likely to have contaminated water supplies. The lower classes spread rumors that the outbreak was an elitist plot to subdue the masses, and the epidemic exacerbated class tensions. Meanwhile, conditions in France continued to be characterized by violence during the early 1830s as Louis Philippe attempted to establish his regime's authority. The most significant of these uprisings was the republican-dominated June Revolution of 1832. Victor Hugo and other contemporaries perceived the barricades of June as natural extensions of the cholera epidemic or the political continuation of a biological crisis. The sad fate of the uprising, however, prompted republicans to regroup and develop new strategies for success. As a whole, then, 1832 helped solidify the end of the Bourbon monarchy and class identities and was a crucial moment in the reorganization and growing solidification of French republicanism that paved the way for the Revolution of 1848. This edited collection examines these three pivotal events in French history in 1832: a royal Legitimist uprising led by the Duchesse de Berry, the cholera epidemic, and the June Revolution, featured in the climax of Hugo's novel *Les Misérables* within the context of the legacy of the French Revolution. While the events of 1832 are significant, they have been relatively ignored because scholars have been distracted by the Revolutions of 1830 and 1848. This collection is the first piece of scholarship to examine these three events in an interconnected pattern to better examine France as it transitioned from a monarchy to a republic. As a result, this collection will be of value to both historians and academics studying diverse subfields within French and European studies.

Trade and Civilisation Kristian Kristiansen, Thomas Lindkvist, Janken Myrdal, 2018-07-05. This book provides the first global analysis of the relationship between trade and civilisation from the beginning of civilisation 3000 BC until the modern era 1600 AD. Encompassing the various networks including the Silk Road, the Indian Ocean trade, Near Eastern family traders of the Bronze Age, and the Medieval Hanseatic League, it examines the role of the individual merchant, the products of trade, the role of the state, and the technical conditions for land and sea transport that created diverging systems of trade and in the development of global trade networks. Trade networks, however, were not durable. The book focuses on the establishment and decline of great trading network systems and how they related to the expansion of civilisation and to different forms of social and economic exploitation. Case studies focus on local conditions as well as global networks until the sixteenth century when the whole globe was connected by trade.
