The Body as Object and Instrument of Knowledge Charles T. Wolfe,Ofer Gal,2010-04-07

It was in 1660s England according to the received view in the Royal Society of London that science acquired the form of empirical enquiry we recognize as our own an open collaborative experimental practice mediated by specially designed instruments supported by civil discourse stressing accuracy and replicability Guided by the philosophy of Francis Bacon by Protestant ideas of this worldly benevolence by gentlemanly codes of decorum and by a dominant interest in mechanics and the mechanical structure of the universe the members of the Royal Society created a novel experimental practice that superseded former modes of empirical inquiry from Aristotelian observations to alchemical experimentation This volume focuses on the development of empiricism as an interest in the body as both the object of research and the subject of experience Re embodying empiricism shifts the focus of interest to the life sciences medicine physiology natural history In fact many of the active members of the Royal Society were physicians and a significant number of those disciples of William Harvey and through him inheritors of the empirical anatomy practices developed in Padua during the 16th century Indeed the primary research interests of the early Royal Society were concentrated on the body human and animal and its functions much more than on mechanics Similarly the Acad mie des Sciences directly contradicted its self imposed mandate to investigate Nature in mechanistic fashion devoting a significant portion of its M moires to questions concerning life reproduction and monsters consulting empirical botanists apothecaries and chemists and keeping closer to experience than to the Cartesian standards of well founded knowledge These highlighted empirical studies of the body were central in a workshop in the beginning of 2009 organized by the unit for History and Philosophy of Science in Sydney The papers that were presented by some of the leading figures in this area are presented in this volume
