The examples based on real world design problems reflect a holistic view of the design process that better equip the reader for timber design in practice. This new edition now includes the LRFD method with some design examples using LRFD for joists, girders and axially load members. It is based on the 2015 NDS and 2015 IBC model code. It includes a more in depth discussion of framing and framing systems commonly used in practice such as metal plate connected trusses, rafter and collar tie framing and pre engineered framing. It includes sample drawings, drawing notes and specifications that might typically be used in practice. It includes updated floor joist span charts that are more practical and are easy to use. It includes a chapter on practical considerations covering topics like flitch beams, wood poles used for footings, reinforcement of existing structures and historical data on wood properties. It includes a section on long span and high rise wood structures. It includes an enhanced student design project.

Integrated Seismic Design of Structure and Control Systems Paolo Castaldo, 2013-11-26. The structural optimization procedure presented in this book makes it possible to achieve seismic protection through integrated structural control system design. In particular, it is explained how slender structural systems with a high seismic performance can be achieved through inclusion of viscous and viscoelastic dampers as an integral part of the system. Readers are provided with essential introductory information on passive structural control and passive energy dissipation systems. Dynamic analyses of both single and multiple degree of freedom systems are performed in order to verify the achievement of pre assigned performance targets and it is explained how the optimal integrated design methodology also relevant to retrofitting of existing buildings should be applied. The book illustrates how structural control research is opening up new possibilities in structural forms and configurations without compromising structural performance.
