Google Manual Spam Action Revoked:

Mastering Your Website John Colascione, 2012-04-16 This 214 page 31 chapter book is designed to be useful to EVERYONE from beginning website owners to intermediate and advanced website developers and marketers. The opening chapters cover the basics before Colascione dives into the more detailed information people need to build and maintain a successful website on Google. The progression takes readers from the starting point of registering their domain name all the way through website editing software to Search Engine Optimization for developed sites including insight into the most sophisticated search engine algorithms like Google Panda and Google Penguin which ultimately determine how high websites are ranked. The first few chapters cover domain names and web hosting as well as IP's, DNS, web site builders, web editing software like Dreamweaver and Photoshop and how to get a site started. Do not let this initial simplicity fool you. After the basics are out of the way, the book covers Search Engine Optimization specifically for Google and how you should go about building and optimizing a web site. There are several chapters on text links due to the importance they play in search visibility and what to avoid. Google Penguin as well as what to go after. After the semi-intermediate topics are out of the way, the reader dives into search algorithms, advanced content marketing, reputation management, social media, some strategic ideas and touches on most of the new things Google is doing. Finally, together with the author, the reader tears deep into some Google Patents specifically DOCUMENT SCORING BASED ON DOCUMENT CONTENT UPDATE, Google Panda Content Freshness and METHOD FOR NODE RANKING IN A LINKED DATABASE, PageRank Links, all of which are extremely relevant to what is happening today's advanced algorithms. The book concludes with advice and predictions from the author for the future. This book is about fully understanding everything to do with your web site and what it means to Google. This book is clear, concise, backed up with factual data straight from Google's own patents and effectively teaches you not just what to do with your site but exactly why you're doing it in the first place. By truly understanding your web site, search engine optimization, social media and how it all ties into your brand, you can better plan and implement strategies which will save you time, money and effort all while helping you avoid easily overlooked mistakes that could wind up costing you your entire online business. This book explains Domain names, web hosting, IP addresses, site builders and development tools. Explore advanced operation of organic search engines, ranking, indexing, information storage and retrieval systems and PageRank algorithms with reference to patent claims. Understand Google search engine decision making process and operation of advanced Google operators, algorithms and filters. Off page and on page SEO techniques and Semantic web and website accessibility. Site architecture issues and website monetization. Planning in bound linkage and effective merit based link building. Common black hat and white hat techniques, consequences of black hat techniques. Metrics and monitoring. Tools to monitor website performance, traffic and rankings. Using Google Webmaster Tools and Analytics. Social media marketing. Twitter, Facebook, Google+, Pinterest, LinkedIn etc. Content marketing. PR and press release marketing. Pay per click.
