

### **PRECAUTIONS FOR INSPECTION AND MAINTENANCE**

Be sure to stop the engine.

Place a notice board "under inspection and maintenance" on the cab door or control lever.

Never get under the machine while it is jacked up by the boom and arm:

When inspecting or servicing the machine with raised boom and arm, always use safety blocks, safety supports, etc.

### **MOVE EXCAVATOR SAFELY**

Before you move the excavator, find out which way to move propel pedals for the direction you want to go. If propel motors (A) are in front of the cab, push down the rear of the propel pedals (B) to move forward.

Do not travel without a signal person for a guide.

Do not travel near the edge of a ditch, gully, or excavation.

Travel carefully where room is limited, over rough ground, and on slopes.

### **PARK SAFELY**

Before you leave the cab:

Lower bucket to ground.

Stop engine.

Put control lever in neutral position.

If you park the excavator on a slope, put blocks against tracks.

Do not park excavator with tracks pointed downhill.

Take the engine key and cab door key with you.
