**Handbook on Session Initiation Protocol** Radhika Ranjan Roy, 2018-09-03 Session Initiation Protocol SIP standardized by the Internet Engineering Task Force IETF has emulated the simplicity of the protocol architecture of hypertext transfer protocol HTTP and is being popularized for VoIP over the Internet because of the ease with which it can be meshed with web services However it is difficult to know exactly how many requests for comments RFCs have been published over the last two decades in regards to SIP or how those RFCs are interrelated Handbook on Session Initiation Protocol Networked Multimedia Communications for IP Telephony solves that problem It is the first book to put together all SIP related RFCs with their mandatory and optional texts in a chronological and systematic way so that it can be used as a single super SIP RFC with an almost one to one integrity from beginning to end allowing you to see the big picture of SIP for the basic SIP functionalities It is a book that network designers software developers product manufacturers implementers interoperability testers professionals professors and researchers will find to be very useful The text of each RFC from the IETF has been reviewed by all members of a given working group made up of world renowned experts and a rough consensus made on which parts of the drafts need to be mandatory and optional including whether an RFC needs to be Standards Track Informational or Experimental Texts ABNF syntaxes figures tables and references are included in their original form All RFCs along with their authors are provided as

references The book is organized into twenty chapters based on the major functionalities features and capabilities of SIP
