A.

Verhoeven, 2019-07-04 This volume explores major wetland ecosystem services such as climate cooling and water quality improvement and discusses the recent wetland conservation and restoration activities in China and neighboring countries. The role of wetlands in either cooling or warming the climate is analyzed as the net balance between carbon sequestration and emissions of methane and nitrous oxide. Wetlands start off having a net warming effect on the climate but in time switch to net cooling. Further they remove 40% of the N and P from run off and groundwater flow in agricultural areas but wetlands need to amount to 10% of the total catchment area to make a difference. Reflecting on the recent large investment in wetland ecological studies in China and neighboring countries the book addresses invasive species in coastal wetlands as well as the protection and wise use of tidal flats around the Yellow Sea. It also presents promising regional case studies on wetland restoration. The book is intended for academics students and practitioners in the field of wetland ecology management and restoration as well as consultants and professionals working in conservation wise use and environmental policy. **English**

ICF-Based assessment and documentation of functioning and disability Michaela Coenen, Thomas Maribo, Soraya Maart, 2023-03-15 *The Bible, Mormon Scripture, and the Rhetoric of Allusivity* J. Frederick, 2016-05-05 One of the most pertinent questions facing students of Mormon Studies is gaining further understanding of the function the Bible played in the composition of Joseph Smith's primary compositions the Book of Mormon and the Doctrine and Covenants With a few notable exceptions such as Philip Barlow's *Mormons and the Bible* and Grant Hardy's *Understanding the Book of Mormon* full length monographs devoted to this topic have been lacking This manuscript attempts to remedy this through a close analysis of how Mormon scripture specifically the Book of Mormon and the Doctrine and Covenants integrates the writings of New Testament into its own text This manuscript takes up the argument that through the rhetoric of allusivity the allusion to one text by another Joseph Smith was able to bestow upon his works an authority they would have lacked without the incorporation of biblical language In order to provide a thorough analysis focused on how Smith incorporated the biblical text into his own texts this work will limit itself only to those passages in Mormon scripture that allude to the Prologue of John's gospel John 1 1 18 The choice of the Prologue of John is due to its frequent appearance throughout Smith's corpus as well as its recognizable language This study further argues that the manner in which Smith incorporates the Johannine Prologue is by no means uniform but actually quite creative taking at least four different forms Echo Allusion Expansion and Inversion The methodology used in this work is based primarily upon recent developments in intertextual studies of the Bible an analytical method that has proved to be quite effective in studying later author's use of earlier texts **Chinese Lexical**
