

Exhaust system check

Perform a visual inspection of the exhaust system first, in order to identify possible gas leaks from the sealing elements (gaskets), and to ensure that the Silent-Blocks are not damaged.

Subsequently, inspect the single components by disassembling the exhaust system.

In addition to this, check the tightening of the screws (1) of the flanges and the tightening of the screws (2) that strap the silencer to the respective supports.

The damaged or broken parts must be replaced.
