accredited by international organizations The ISO or International Standards Organization is a worldwide standard setting group headquartered in Geneva and ANSI the American National Standards Institute is the USA's representative to ISO CompTIA has been accredited by ANSI for compliance with the ISO standard that applies to operating a certification body or organization and CompTIA must maintain certain quality levels in order to maintain that accreditation That's a bit of background on CompTIA and the Network certification But who might benefit from this credential Well anyone wanting to be hired on by a company that requires it certainly but more broadly anybody pursuing a career in tech support for example as a help desk analyst service desk analyst or a desktop support technician Field service techs will also find the credential helpful as will those who aspire to being a network engineer or a documentation specialist in IT This book will help you prepare for the latest CompTIA Network Certification exam code N10 008 BUY THIS BOOK NOW AND GET STARTED TODAY In this book you will discover Network Troubleshooting Fundamentals How to Establish a Theory of Cause How to Test the Theory Establish a Plan of Action How to Test Verify and Document the Solution How to Identify and Troubleshoot Cable Issues Fiber Optic Cables Tools How to use Ping ARP Traceroute How to Capture Traffic Wireless Troubleshooting WiFi Tools Common Wireless Issues Configuration Issues How to Troubleshoot Routing Issues How to use Simple Network Management Protocol How to use Netflow How to use Syslog How to Document IT Procedures and Plans Security and Device Policies Data Center Diagrams MDF IDF Diagrams Logical Network Diagrams Disaster Recovery Backups and Snapshots Service Level Agreement Fundamentals BUY THIS BOOK NOW AND GET STARTED TODAY
