 van Merrienboer,2013-11-11 In the last decade there have been rapid developments in the field of computer based learning
 environments A whole new generation of computer based learning environments has appeared requiring new approaches to
 design and development One main feature of current systems is that they distinguish different knowledge bases that are
 assumed to be necessary to support learning processes Current computer based learning environments often require explicit
 representations of large bodies of knowledge including knowledge of instruction This book focuses on instructional models as
 explicit potentially implementable representations of knowledge concerning one or more aspects of instruction The book has
 three parts relating to different aspects of the knowledge that should be made explicit in instructional models knowledge of
 instructional planning knowledge of instructional strategies and knowledge of instructional control The book is based on a
