If working outside the workshop, park the truck preferably on the level and immobilize it. If working on a slope is unavoidable, chock the wheels to prevent the machine moving and transfer it to a level area as soon as it is safe to do so. Disconnect the batteries and label all the controls to warn of the work in progress. Immobilize the machine and all equipment that has to be lifted.

When towing, use solely the prescribed points of connection and make sure the pins and/or bolts are firmly secured before starting to pull. Lift and handle all heavy parts using lifting equipment of suitable load capacity. Use the lifting eyes provided. Beware of persons in the immediate vicinity of the load to be lifted. Do not get chains or metal ropes tangled up. Do not trust damaged chains and ropes (kinked, etc.); do not use them for lifting or pulling. Always wear safety gloves when handling chains and ropes. Handle all parts with care; do not put your hands or fingers between one part and another. Wear type-approved accident-prevention equipment such as safety goggles, gloves and footwear.
