Developments in the International Harmonization of Accounting Christopher Nobes,2004 The measurement of harmonization became a well established area of academic research from the late 1980s and the discerning selection of papers in this volume reveal a continuing interest in the topic by a large number of researchers The coverage is divided into two parts The first part concerns the measurement of harmonisation and the second contains analysis of and comment on harmonization This authoritative new volume will be of great interest to all those concerned with the issue of harmonization in international accounting

[International Classification of Financial Reporting](#) Christopher Nobes,2014-08-07 Financial reporting practices differ widely between countries and this has far reaching implications for multinational businesses Over more than a century there have been attempts to classify countries into groups by similarities of practices With the recent spread of International Financial Reporting Standards it might appear that classification is largely of historical interest but this is not the case for several reasons explained in this book Christopher Nobes offers a critical analysis of the many previous accounting classifications having drawn lessons from other fields of science and social science Revised and updated to reflect the IFRS era the book discusses how old classifications are reflected in today s international differences in practice under IFRS It concludes with a discussion on the most useful classifications and how classifications can still be relevant in the era of international standards This book will be essential for academics postgraduates and undergraduates in international accounting accounting theory and to international accounting professionals
