Large Igneous Provinces and their Plumbing Systems R. K. Srivastava,R. E. Ernst,,K. L. Buchan,,M. De Kock,2022-03-15

Identification of large volume short duration mafic magmatic events of intraplate affinity in both continental and oceanic settings on the Earth and other planets provides invaluable clues for understanding several vital geological issues of current concern. Of particular importance is understanding the assembly and dispersal of supercontinents through Earth's history, dramatic climate change events including mass extinctions and processes that have produced a wide range of large igneous province (LIP) related resources such as Ni-Cu-PGE-Au-U base metals and petroleum. This volume comprises 21 contributions on the latest developments and new information on LIPs and their plumbing systems and presents methodical studies on different components of LIP plumbing systems. These articles are especially helpful in understanding continental break-up events, regional domal uplift and a variety of metallogenic systems as well as the temporal and spatial distribution of LIPs, their origin and their likely links to mantle plumes/superplumes.

General Technical Report RM., 1987 Database and Expert Systems Applications Dimitris Karagiannis, 2013-11-11. The Database and Expert Systems Applications (DEXA) conferences are dedicated to providing an international forum for the presentation of applications in the database and expert systems field for the exchange of ideas and experiences and for defining requirements for the future systems in these fields. After the very promising DEXA 90 in Vienna, Austria, we hope to have successfully established with this year's DEXA 91 a stage where scientists from diverse fields interested in application-oriented research can present and discuss their work. This year there was a total of more than 250 submitted papers from 28 different countries in all continents. Only 98 of the papers could be accepted. The collection of papers in these proceedings offers a cross-section of the issues facing the area of databases and expert systems, i.e. topics of basic research interest on one hand and questions occurring when developing applications on the other. Major credit for the success of the conference goes to all of our colleagues who submitted papers for consideration and to those who have organized and chaired the panel sessions. Many persons contributed numerous hours to organize this conference. The names of most of them will appear on the following pages. In particular, we wish to thank the Organization Committee Chairmen Johann Gordes, Achim Min, Tjoe and Roland Wagner, who also helped establishing the program. Special thanks also go to Gabriella Wagner and Anke Ruckert. Dimitris Karagiannis, General Conference Chairman.
