*Foundations of Global Business* Dina Frutos-Bencze, Nader H. Asgary, Massood V. Samii, 2015-09-01 In the past three decades a number of important changes have made international business more complex and exciting The rapid and continuous changes in information and communications technology ITC reduced trade barriers among countries and regionalization have increased the links and dependency among firms from various countries This has created opportunities for increasing expansion to new markets and increasing global integration while simultaneously posing many challenges This book views international business as a complex and integrated system and takes a systems approach to study and analyze the changes thus enabling readers to assess global business opportunities and risk in a comprehensive and integral manner The topics presented in this book allow practitioners scholars and students of international business to have

a broad understanding of the most relevant issues in a changing international environment      **Global Business** Nader H. Asgary, Dina Frutos, Bencze, Massood V. Samii, Hossein Varamini, 2021-01-01 The arrival of the COVID 19 pandemic throughout the globe at the end of 2019 turned global business upside down It forced the closure of many businesses disrupted global supply chains reduced travel across borders and created fear about face to face interactions As the lockdowns in many countries created uncertainty about the future business activities global business leaders were scrambling to find new strategies to safely re establish their business relationships with their stakeholders The existing historical economic social and racial injustice in the American society toward Black Indigenous and People of Color was compounded by the COVID 19 This led the movements of the Black Lives Matter to reenergize and become a global phenomenon The horrific and sad death of George Floyd and many others triggered huge global movements to demand respect for human rights and dignity for all Additionally climate change and environmental degradation have caused unprecedented forests fires more frequent and damaging hurricanes and migration demand a revived global business book This third edition of *Global Business An Economic Social and Environmental Perspective* incorporates global business issues related to COVID 19 the economic and social injustice of BIPOC and environmental degradation where it is appropriate The reader will understand the impact of these critical global business issues discussed in the book through examples case studies and thought provoking discussions These challenges require businesses governments and the active engagement of citizens to succeed The aim of this book is to bring these issues for discussion and action by these stakeholders Each chapter includes supplementary PowerPoint slides Test Bank and Teaching notes that are available for instructors only      *The Bounds of Responsibility* Tadeusz Lewandowski, Elisabeta Gabriela Ilie, 2019-01-04 This volume was first published by Inter Disciplinary Press in 2014 This volume examines our fundamental obligations as humans The chapters offer innovative models and philosophies for responsible living covering the areas of consumption bioethics community inclusion disability the EU debt crisis and the body Each nevertheless grapples with the central question of what we owe others whether on the personal societal industrial governmental or international level and the problem of how far these responsibilities are realized and extended This book s title *The Bounds of Responsibility* is therefore meant to suggest both how responsibilities should in some cases be limited and can often be limiting For while we cannot take full responsibility for all those we encounter we can neither break away from the obligations that define humans In analysing responsibility s limits the authors formulate conclusions of differing degrees but agree on the imperative to integrate some substantial philosophy of responsible living into social and economic structures for the common good      **COLLECTIVE INSTITUTIONS IN INDUSTRIALIZED NATIONS: Economic Lessons for sub-Saharan Africa** Samuel Enajero, Ph.D., 2015-12-08 Fundamental institutions are core values that originate from beliefs Beliefs reflect on behaviors and repeated behaviors become habits Shared habits are peoples values which when ingrained become norms and customs Societies that believed in human interdependency formed

collective institutions These institutions are compatible with modern economic prosperity Thus Contrary to conventional economic teaching which implies that behaviors including preferences are biologically determined all socially relevant behaviors including economic behaviors are acquired learned and routinized through habits institutions in which individuals find themselves Again contrary to popular beliefs that economics is about pursuit of self interest as stipulated by Adam Smith 1776 the pursuit of self interest does not translate to selfishness For example an entrepreneur relies on public capitals and skilled labors to succeed a producer relies on adequate consumption to produce at capacity a firm s profit is enhanced with higher consumer income etc Therefore capitalism is a function of collective institutions Collectivism is a solution to group interdependency People sharing the same space are interdependent and are faced with interdependency costs Interdependency cost equals external cost plus decision making cost Failures to eliminate or minimize external costs externalities through collectivization of activities result to resource misallocation The problem of sub Saharan Africa Moreover modern development theories are constructed around macroeconomic variables Money banking interest rate savings trade liberalization financial assets deficit and debt management are modern macroeconomic development tools These are based on aggregation of data and variables Thus collectivism is more pronounced in macroeconomic policies Yet many emerging nations of sub Saharan Africa do not find it mandatory to build all inclusive economies by mobilizing resources en masse

*Microeconomics* Avinash Dixit, 2014-04-24 *Microeconomics* individuals choices of where to live and work how much to save what to buy and firms decisions about location hiring firing and investment involves issues that concern us on a daily basis But when people think about economics they tend to place importance on the bigger picture macroeconomics including issues such as unemployment inflation and the competitiveness of nations In this Very Short Introduction Avinash Dixit argues that the microeconomy has a large impact on the economic world arguably as much as the issues of macroeconomics Dixit steers a clear path through the huge number of issues related to microeconomics explaining what happens when things go well as well as showing how they fail why that happens and what can be done about it Using real life examples from around the world using the minimum of mathematics and including simple graphs he provides insights into economics from psychology and sociology to explain economic behaviour and rational choice An ideal introduction for anyone interested in business and economics

**ABOUT THE SERIES** The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

Economic & Administrative Sciences (QMEAS 2013) Christos Frangos, **Microeconomics in Modules** Paul Krugman, Robin Wells, 2021-07-30 When it comes to explaining fundamental economic principles by drawing on current economic issues and events no one is more effective than Nobel laureate and New York Times columnist Paul Krugman and co author Robin Wells In this modular text Krugman and Wells signature storytelling style helps readers understand economic concepts in the real world Instead of long traditional chapters of traditional length this version presents brief modules each focused on one topic and easy to read in one sitting **Macroeconomics** Paul Krugman, Robin

Wells, 2012-05-29 When it comes to explaining current economic conditions there is no economist readers trust more than New York Times columnist and Nobel laureate Paul Krugman Term after term Krugman is earning that same level of trust in the classroom with more and more instructors introducing students to the fundamental principles of economics via Krugman s signature storytelling style The new Third Edition of Paul Krugman and Robin Wells s Economics is their most accomplished yet extensively updated to offer new examples and stories new case studies from the business world and expert coverage of the ongoing financial crisis Watch a video interview of Paul Krugman here **Economics as an Empirical Social Science**

Daniel Weißbrodt, 2024-07-08 Economics still adheres entirely unreflectively to a mechanistic worldview and machine thinking Epistemologically it thus remains in the 19th century and its assumptions and theories methods and models therefore stand in stark contradiction to the findings of all other social and natural sciences as well as a multitude of

empirical facts Through a discourse analytical examination of sixteen basic concepts in economics based on twelve standard economics textbooks their ideahistorical origin and use are worked out and compared and related to the current state of knowledge of other disciplines This reveals the structural methodological and content errors of economics in a clear manner Especially for critical students who have long been demanding an economics that is in line with the current state of research and faces the challenges of the 21st century this opens up the possibility of a new approach to economics The Content Discourse analytical examination of fundamental assumptions and concepts of economics from labor to wealth Structural methodological and content critique of economic thinking from an epistemological perspective Critical examination of the use of empirical and statistical data the method of gaining knowledge and the model thinking in economics
