

**GRADE 11 MATHEMATICS  
NOVEMBER EXAMINATION PAPER 2**

**QUESTION 1**

1.1 Calculate the following with the use of a calculator:

1.1.1  $\sin 43^\circ + \cos 47^\circ$  (1)

1.1.2  $\tan^2 50^\circ$  (1)

1.1.3  $\cot 33^\circ + \operatorname{cosec} 15^\circ$  (1)

1.2 If  $A = 34,3^\circ$  and  $B = 22,2^\circ$ , calculate the following to two decimal places:

1.2.1  $\sin (A + B)$  (2)

1.2.2  $\sec \left( \frac{A}{2} \right)$  (2)

1.3 Calculate the following without the use of a calculator:

1.3.1  $\sin 30^\circ + \cos 60^\circ$  (1)

1.3.2  $\tan 45^\circ + \cos 45^\circ$  (1)

1.3.3  $\cos 90^\circ + \sin 90^\circ$  (1)

[12]

**QUESTION 2**

Without the use of a calculator, answer the following questions:

2.1 Given  $\cos \theta = -\frac{1}{5}$  and  $0^\circ \leq \theta \leq 180^\circ$   
Use a diagram to determine the values of:

2.1.1  $\tan (180^\circ + \theta)$  (1)

2.1.2  $3\sin (\theta - 90^\circ)$  (2)

2.2 Simplify the following expression:  $\frac{\sin(-230^\circ)}{\cos(240^\circ)} + \frac{\cos(190^\circ)}{\sin(260^\circ + \pi)}$  (5)

2.3 Prove that:  $\tan \theta \sqrt{\frac{1}{\sin^2 \theta} - 1} = 1$  (4)

2.4 Determine the general solution for:  $3\sin^2 \theta + 1 = \sin \theta$  (6)

[28]

**QUESTION 3**

3.1 Sketch on the same set of axes the graphs for:

$f(x) = -2\cos x$  and  $g(x) = \sin 2x$ , for the interval  $-90^\circ \leq x \leq 180^\circ$ .

Show the coordinates of the turning points and all axis intercepts. (5)

3.2 Study the following sketch and determine the value of  $\cos \theta - \cos \phi$ , without the use of a calculator.

(5)  
[10]

**QUESTION 4**

In the diagram below, the angle between line AB and the x-axis is  $\beta$ . The angle between line CD and the x-axis is  $\theta$ . A and D are the x-axis intercept points for lines AB and CD respectively. The coordinates of point B are  $(\sqrt{3}, 2)$ .

The intercept point E, of lines AB and CD lies on the y-axis.  $\angle EDC = 63,69^\circ$

The equation of the line CD is given as:  $3x + 2y = 6$

4.1 Determine the coordinates of E. (2)

4.2 Calculate the numerical value of  $\alpha$ . (2)

4.3 Calculate the numerical value of  $\beta$ . (2)

Topic aims at demonstrating that these insights have had a decisive impact on Mathematics Education We want to stress that we are concerned with the view of bounded rationality that is different from the one espoused by the heuristics and biases program In Simon's bounded rationality and its direct descendant ecological rationality rationality is understood in terms of cognitive success in the world correspondence rather than in terms of conformity to content free norms of coherence e.g. transitivity

*International Handbook of Mathematical Learning Difficulties* Annemarie Fritz, Vitor Gerald Haase, Pekka Räsänen, 2019-01-30 This comprehensive volume provides teachers, researchers and education professionals with cutting edge knowledge developed in the last decades by the educational behavioural and neurosciences integrating cognitive developmental and socioeconomic approaches to deal with the problems children face in learning mathematics The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades but the most part of this research has been conducted in non applied settings and there's still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings Now it's time to bring the results from the laboratory to the classroom Apart from bringing the theoretical discussions to educational settings the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues And it does so from an international perspective dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society

**Research for Educational Change** Jill Adler, Anna Sfard, 2016-06-17 Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice Focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice In the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This

book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research

**Planning and facilitating group learning** Marcus Witt,Ben Knight,2025-02-28 This is an innovative text for teacher educators exploring detailed research and information that novice teachers need to know about group work in school settings There is more to learn about group work than simply sitting children together and letting them get on with it Group work across schools is very common and trainee teachers will step into classrooms where small groups are a predominant structure Research has suggested that there is a great deal more to understand about group work however there is a tacit presumption in ITE that trainee teachers will simply pick up the expertise associated with organising and managing group work This book aims to fill in the gaps and educate trainee teachers on the subtleties and complexities of group work to ultimately make their teaching more impactful and effective In this accessible and informative guide the authors delve into the existing research on how children learn in collaborative groups and what trainee teachers need to learn and understand about planning and executing group learning It examines the skills teacher educators should aim to develop in pre service teachers to help them build expertise in this important area Following other books within the series this book is packed with case studies and opportunities for critical thinking

*The Armed Forces Covenant in action?* Great Britain: Parliament: House of Commons: Defence Committee,2013-07-18 A series of Ofsted inspections on Army Apprenticeships conducted in 2013 rated the overall effectiveness as good This was an improvement over the last inspection in 2009 rated as satisfactory now called requires improvement Some 28 per cent of Army recruits were less than 18 years of age Further information is needed on why the Army is so dependent on recruiting personnel under the age of 18 years compared to the other two Services and whether steps are being taken to reduce this dependency Of those recruited in 2012 3 5 per cent of the Army were rated at entry level 2 for literacy that of a 7 to 8 year old and 39 per cent had a literacy level of an eleven year old If as the MoD states it has to recruit personnel at whatever level of attainment is available then it should boost remedial action when recruitment entry standards are particularly low In light of changes brought about by Future Force 2020 it may be that recruiting personnel with higher levels of attainment would better meet the future needs of the Armed Forces Whilst the Committee recognises that some recruits may not be eager to take further academic exams the MoD should encourage more recruits to undertake English and Maths GCSEs which would stand them in good stead for

future employment The MoD has carried out some useful pilot projects with paramedic training and should identify more potential projects to ensure that vital skills paid for by the MoD are not lost to the country **Effective Teaching** Daniel Muijs, David Reynolds, 2017-10-16 This new edition of the popular textbook digs into the research behind different aspects of teaching in order to give students an informed understanding of what underpins high quality teaching It explores what the evidence shows about the effectiveness of different approaches drawing from a variety of educational schools of thought New to this edition enhanced discussion of what we can learn from cognitive science research new chapters on metacognition and thinking skills teacher subject knowledge evaluating teacher performance and international comparisons on teaching new Further Reading and Think Point features encouraging critical engagement with key research findings This is essential reading for all students on initial teacher education courses including undergraduate postgraduate School Direct Teach First and employment based routes into teaching and also qualified teachers wanting to deepen their understanding of educational research **Social Sciences and Interdisciplinary Behavior** Ford Lumban Gaol, Fonny Hutagalung, Nailya Bagautdinova, Lenar Safiullin, 2016-09-19 Social Sciences and Interdisciplinary Behavior contains papers that were originally presented at the 4th International Congress on Interdisciplinary Behavior and Social Science 2015 ICIBSoS 2015 held 22-23 October 2015 at The Institute of Management Economics and Finance of the Kazan Federal University Kazan Russia and 7-8 November 2015 in Arya Duta Hotel Jakarta Indonesia The contributions deal with various interdisciplinary research topics particularly in the fields of social sciences education economics and arts The papers focus especially on such topics as language cultural studies economics behavior studies political sciences media and communication psychology and human development **Born to Fail?: Social Mobility: A Working Class View** Sonia Blandford, 2017-10-02 Sonia Blandford CEO of award winning charity Achievement for All writes brilliantly and honestly about the facing up to the realities of the white working class and how to address social mobility from the inside No one in the UK is better placed than Sonia to write about the struggles of white working class pupils in our schools She grew up on the Allied Estate in Hounslow and was the first member of her family to pursue education beyond the age of 14 and was also the first to attend university Sonia lost her mother when she took an accidental overdose when she couldn't read the doctor's prescription This tragic failing served as one of the inspirations for her to set up the award winning Achievement for All organisation who work with thousands of schools to help close the attainment gap Born to Fail tackles head on issues such as why education often doesn't matter to the working class how education has failed to deliver for them the importance of self belief action and confidence and how the Early Years is the crucial time to build success from the start **Gender and STEM** Namrata Gupta, 2025-02-27 This book studies the prevalence of gender inequalities in the domains of science technology engineering and mathematics STEM in India It explores the paradox of an increasing number of women pursuing higher education in STEM fields while a relatively low percentage enter the job market The book analyzes the factors that contribute to the loss of potential

contributions from women in science It underscores the need to understand the construction of masculinity and femininity as well as male privilege and female disadvantage and how these concepts are associated with STEM Lucid topical and rich in empirical data this book will be indispensable for scholars and researchers of women s studies gender studies sociology of science science and technology studies political studies and public policy It will also be useful to policymakers organizations and professionals working in the STEM fields     *Australian National Bibliography: 1992* National Library of Australia,1988
