Labour Beyond Cosatu Andries Bezuidenhout, Malehoko Tshoaedi, Christine Bischoff, 2017-07-01 Labour Beyond Cosatu is the fourth volume in the series Taking Democracy Seriously a ground breaking textured and nuanced study on workers and democracy which was established in the 1990s The series looks at members of trade unions affiliated to the Congress of South African Trade Unions Cosatu and provides a rich database of trade union members and research conducted over the past twenty years It is one of the very few such resources available to researchers anywhere in the world Labour Beyond Cosatu paints a complex picture The 12 chapters of the volume explore various rebellions and conflicts in the trade union sector starting with the National Union of Mineworkers NUM and rivalries between Cosatu affiliates Unpacking the conflicts

between state sector and private sector workers contributors look at the impact of generational and educational shifts seen by some commentators as proof that Cosatu is now middle class The book also raises the issue of gender in the unions by usefully locating the controversy around charges levelled at Zwelinzima Vavi in 2013 in the larger context of serious problems in the gender politics within parts of Cosatu Refuting the image of a union federation solidly committed to the ANC Labour Beyond Cosatu presents evidence of a sharp decline in support for the ANC within Cosatu and growing scepticism towards the Alliance It shows that attempts to understand the labour movement in South Africa in the future will need to include research of smaller independent unions and social movements The volume s contributors make a major contribution to key debates on labour and democracy providing new material that can potentially shift the discussion in important ways This book will be of great value to students and researchers in Industrial Sociology Political Studies Industrial Psychology and Economics and Management Social Studies Education in South and South East Asian Contexts Kerry J

Kennedy,2021-07-22 The education of young people is context bound This edited volume explores the contexts that characterise South and South East Asia and their influence on social studies education There is not a single context across this broad geographical expanse rather different religions different political systems and different values exert influences that create distinctive programmes that characterise different countries Yet there are also commonalities such as the post colonial nature of most of the countries portrayed in this book determined efforts at establishing new national communities and multiple value systems that lead to distinctive local priorities There are also voices of resistance in these chapters recognising the realities of local contexts but also recognising the need for change Social studies education in these contexts may well be descended from its origins in North America but in South and South Asian contexts it has taken on new purposes new forms and new values Education researchers policymakers and postgraduate students in comparative education will find the volume useful in its exploration and comparison of the social studies curricular and reforms that shaped them Pacific

Public Examinations Examined Thomas Kellaghan, Vincent Greaney, 2019-11-19 High stakes public examinations exert a dominant influence in most education systems They affect both teacher and student behavior especially at the middle and upper levels of secondary education The content of past examinations tends to dictate what is taught and how it is taught and more important what is learned and how it is learned By changing aspects of these examinations especially their content and format education systems can have a strong positive impact on teacher behavior and student learning help raise student achievement levels and better prepare students for tertiary level education and for employment Examination agencies many

of which have followed the same procedures over decades can learn from the successes and failures of other systems This book addresses current issues related to the development administration scoring and usage of these high stakes public examinations identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies The book s primary audience consists of public examination officials on national regional and state examination boards but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards to academics and researchers interested in educational assessment to governmental and education agencies responsible for student selection and to professionals at development organizations This extremely well written and comprehensive book offers a timely review of the diversity of public examination practices worldwide of the tensions between examinations and learning and of the technical expertise involved in the creation of valid reliable and fair assessments It reminds us that as the diploma disease takes hold with an ever greater intensity at every stage of education worldwide and the commercial business of testing flourishes those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog Angela W Little Professor Emerita Institute of Education University College London This book is very well structured and written and draws on the authors remarkable global knowledge across countries and histories It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings Mark Bray UNESCO Chair Professor of Comparative Education University of Hong Kong and former Director UNESCO International Institute for Educational Planning I am sure that Public Examinations Examined which thoroughly analyzes the practice of public examinations in different countries and makes profound and well grounded conclusions will arouse very great interest and will serve to further improve public examinations Victor Bolotov Distinguished Professor Higher School of Economics National Research University Moscow member Russian Academy of Education and former Deputy Minister of Education Russian Federation

South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are

determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

White Paper on Human Rights in North Korea 2015 Do Kyung-ok, Kim Soo-Am, Han Dong-ho, Lee Keum-Soon, Hong Min, Korea Institute for National Unification (South Korea), 2015-09-24 The 2015 edition of the White Paper on Human Rights in North Korea marks the 20th year of the series since its first publication in 1996 This White Paper is based on in depth interviews with 221 of the 1 396 North Koreans who escaped to South Korea in 2014 These samples were selected with their demographic characteristics and social backgrounds taken into account Below are the key highlights of the survey In its national report for the Universal Periodic Review submitted to the United Nations UN Human Rights Council on January 30 2014 North Korea explained that death penalty is applied to extremely restricted cases In reality however North Korea has an extensive list of crimes punishable by the death penalty defined not just by the Criminal Law but also by its Addendum the death penalty may also be imposed by promulgations instructions and other alternative formats North Korean defectors who have witnessed the death penalty carried out in public have provided testimony that it has actually been given for a wide range of crimes Of special note is that over the last few years the number of people put to death for watching distributing South Korean video recordings or smuggling trafficking narcotics is on a remarkable rise This was widely observed in our 2014 survey too Human rights violations in ordinary prison camps kyohwaso labor training camps rodongdanryundae holding centers jipkyulso detention centers political prison camps kwanliso and other detention facilities are still known to be serious Inhumane treatment including torture and beatings are part of the daily routine nutrition medical care and hygiene are also very poor In our 2014 survey however some interviewees suggested that the human rights conditions in ordinary prison camps kyohwaso were improving somewhat North Korean defector XXX who was held for a long time at the Jongori kyohwaso where a massive number of violent incidents and human rights violations reportedly took place explained that

beatings at the kyohwaso was on the decrease North Korean defector XXX who had been detained at the Jongori kyohwaso until recently said that strenuous effort was being made to bring fatal incidents under control as the reality of the human rights infringements at the kyohwaso were known to the outside world through former inmates Meanwhile the 2014 survey results include testimonies on those released from political prison camps kwanliso in 2012 and 2013 after Kim Jong un took over as the new leader of North Korea Witnesses explained that their release was based on Kim Jong un s policy that those who have one percent of a conscience are given a second chance despite 99 percent of their faults and that these people were released as Kim Jong un upon taking office told those whose crimes were motivated by personal grievance as opposed to criticism of the state should be freed which is within the context of his politics of law Similar cases can be found in North Korea s On site Open Trials System too Testimonies from North Korean defectors show that when On site Open Trials were conducted for a large number of people held for the same charge some of them are executed immediately in public as examples while others are found innocent and released allegedly due to Kim Jong un s consideration or policy While unleashing a reign of terror against the power elites the young leader seems to be seeking to present himself to ordinary citizens as a leader who loves the people Nonetheless the very fact that these measures are possible shows his policies and instructions have supra legal authority in North Korea A typical infringement on freedom of residence the practice of forced deportation is still found to be widespread North Korean defector XXX testified that in 2013 during his on site instructions in Musan Kim Jong un ordered transformation of the city boundaries into an exemplary area This led to the forced deportation of more than 600 households living within 300 meters of the city boundaries Such massive involuntary relocation was enforced primarily upon family members of illegal border crossers or those with criminal records such as illegal use of a mobile phone A number of testimonies also suggested that forced deportation has been on the increase since mid 2013 in Samjiyon County within which is the hometown of Kim Jong il In particular those whose parents are from rural areas former detainees at ordinary prison camps kyohwaso and their family members and illegal border crossers are first to be relocated According to the 2014 survey results little progress has been made in improving North Koreans rights to food and health When it comes to the right to food the total volume of food available has increased since 2010 but North Korea s discriminatory distribution policies has led to continued discrepancy among ordinary citizens in their access to food Collection of excessive amounts of produce from farm workers in particular has undermined their right to food on a continuous basis This seems partly attributable to the assignment of unrealistically high production quota and the falsification of distribution documents Excluded from the Public Distribution System PDS marginalized members of North Korean society tap into money offered by loan sharks to deal with the scarcity ending up suffering even more In the 2014 survey however a large number of interviewees said the public distribution supply has temporarily improved since 2012 as North Korean authorities released military provisions As for the right to health the uneven distribution of resources as a

result of economic hardship and military first politics has destroyed the medical system as a whole The absolute lack of medicine and basic medical equipment has continued while some interviewees pointed out in the 2014 survey that an increasing amount of medicine was being provided by Jungsung Pharmaceuticals Meanwhile as the North's free treatment system is not working properly patients in need of surgery often end up paying for the related costs for themselves The military ranks are also seeing their right to health deteriorating Some interviewees stated that the military was also short on medicine and not just civil society The community doctor system and other mechanisms of preventive medicine propagandized by the North Korean authorities are not functioning properly Community doctors are currently incapable of treating patients and can only issue medical certificates they are known to work primarily on vaccinations such as preventive injections against epidemics A large number of interviewees in the 2014 survey said that vaccination was being offered Vaccination seems to be improving efforts to prevent disease Areas receiving aid from the UN and other international actors also enjoy relatively better medical treatment Despite many constraints and the resulting shortcomings we hope that this White Paper will draw more attention at home and abroad to the issue of human rights in North Korea while contributing to domestic and international discussion and action on improving the situation
