#### ADJUSTMENT LOCATIONS:

Parallax (vertical)	A*
AF accuracy	B*
Exposure (trigger switch)	C
Focus (infinity)	D

\*Adjustments on the AF module should not be necessary. If you replace the AF module, the adjustments are factory-set.

#### ADJUSTMENT PROCEDURES, AUTOFOCUS:

- For parallax and infinity adjustments, it's necessary to hold open the shutter. To hold open the shutter, proceed as follows:
  - Place a piece of black tape over the C405.
  - Remove the self-timer lever and the serial-number plate (bottom of camera).
  - Connect a test lead to the end of R109 (the resistor, Fig. 7, is visible through the slot at the bottom of the camera after removing the serial-number plate). Connect a 1M resistor to the other end of the test lead as indicated in Fig. 2.
  - Release the shutter. While the shutter is open, connect the other end of the 1M resistor to ground (the self-timer shaft). The shutter stays open as long as the test lead remains con-

- nected to R109 and ground.
- Check horizontal and vertical parallax by using a 34" x 22 1/2" test target. Position the camera 1m from the target. Release and hold open the shutter. View the target with a ground glass at the focal plane. Shift the camera until the target corners are within the focal-plane aperture. Then view the target through the finder; the target corners should be within the frame-lens corners. Adjust by shifting the viewfinder mask. Adjustment A, Fig. 1, shifts the frame lens vertically. The horizontal-shift adjustment is under the circuit board at the top of the AF module (directly behind the vertical adjustment).

- Check the selectivity by using a bar target 1/4" wide. Remove the filter ring at the front of the lens so you can observe the position of the slider brush, Fig. 10. When you release the shutter, the slider brush stops at a position on the signal board that corresponds to the selected focus. Adjust the selectivity as follows:
  - Place the bar target 1m from the film plane. The target should not have a highly reflective or matte-black surface. Allow some separation between the bar target and the wall. You can then test to see that the AF selects the small target area.
  - Align the camera so that the bar target appears inside the AF
