Business has spread its activities through information technologies and has used information and information technologies as a strategic force in their competitive efforts. The use of financial resources which gained importance during the industrial revolution now has been replaced by the information economy. Knowledge has become an opportunity cost of financial capital. Production, consumption, distribution, relations, and economic structure, which are considered as the basic elements of the economy, have been restructured on the basis of knowledge. This book reflects the diversity of social science debates and includes three titles: economic growth and globalization, economic and game theory, and public finance. There are various scientific studies under the title of economic growth and globalization. We hope that our readers will enjoy and benefit from these contributions.      *Banker Diploma - City of London College of Economics - 7 months - 100% online / self-paced* City of London College of Economics, Overview This diploma course focuses on the theory and practice of banking and its prospects in the new millennium.
