Saklofske, Gerald Matthews, 2014-09-04 *Measures of Personality and Social Psychological Constructs* assists researchers and practitioners by identifying and reviewing the best scales measures for a variety of constructs Each chapter discusses test validity reliability and utility Authors have focused on the most often used and cited scales measures with a particular emphasis on those published in recent years Each scale is identified and described the sample on which it was developed is summarized and reliability and validity data are presented followed by presentation of the scale in full or in part where such permission has been obtained Measures fall into five broad groups The emotional disposition section reviews measures of general affective tendencies and or cognitive dispositions closely linked to emotion These measures include hope and optimism anger and hostility life satisfaction self esteem confidence and affect dimensions Emotion regulation scales go beyond general dispositions to measure factors that may contribute to understanding and managing emotions These measures include alexithymia empathy resiliency coping sensation seeking and ability and trait emotional intelligence The interpersonal styles section introduces some traditional social psychological themes in the context of personality assessment These measures include adult attachment concerns with public image and social evaluation and forgiveness The vices and virtues section reflects adherence to moral standards as an individual characteristic shaped by sociocultural influences and personality These measures include values and moral personality religiosity dark personalities Machiavellianism narcissism and subclinical psychopathy and perfectionism The sociocultural interaction and conflict section addresses relationships between different groups and associated attitudes These measures include cross cultural values personality and beliefs intergroup contact stereotyping and prejudice attitudes towards sexual orientation and personality across cultures Encompasses 25 different areas of psychology research Each scale has validity reliability info on test bias etc Multiple scales discussed for each construct Discussion of which scales are appropriate in which circumstances and to what populations Examples of scales included **More Than Fluency: the Social, Emotional, and Cognitive Dimensions of Stuttering** Barbara J. Amster, Evelyn R. Klein, 2018-04-27 *More Than Fluency The Social Emotional and Cognitive Dimensions of Stuttering* provides a thoughtful and contemporary framework for speech language pathologists and others working with people who stutter The text focuses on the social emotional and cognitive realms of stuttering and offers new insights and applications based on research in the field It guides the reader through theoretical discussions about the social experiences emotional complications and cognitive interpretations that often influence the person who stutters The text also offers practical strategies for intervention from contributing authors who are prominent theorists researchers and practitioners in the field of fluency and stuttering In line with the current multifactorial view of stuttering *More Than Fluency*

emphasizes the social emotional and cognitive aspects of stuttering drawing important connections between them The authors present a variety of therapeutic interventions and techniques along with practical guidelines that have been designed to alleviate distress in those who stutter Although these interventions differ in approach each offers their own roadmap to support and empower people who stutter The idea for this book grew out of the insights gained from listening to both clients and graduate students Clients wanted to talk about their life experiences as a person who stutters Graduate students often described their worry and uncertainty when dealing with the emotional and social issues of their clients who stutter Similarly many practicing speech language pathologists also have concerns about treating people who stutter especially regarding the social emotional and cognitive aspects of the disorder areas not typically taught in traditional coursework More Than Fluency was developed for practicing speech language pathologists and other professionals who evaluate and treat people who stutter It is also intended to be an academic textbook used in graduate courses on fluency and stuttering This text provides a collection of well thought out programs and approaches that help treat the whole person not just his or her stuttering The authors believe that this is best practice because successfully treating a person who stutters encompasses treating more than fluency

Moral Dilemmas Daniel Statman,1995 Moral dilemmas set a challenge for ethical theory They are situations where agents seem to be under an obligation both to do and to refrain from doing a specific act Are such situations possible What is their exact nature These are the questions that Moral Dilemmas tries to answer The book argues that moral theories should not allow for the possibility of irresolvable dilemmas for situations in which no right answer exists To this end arguments seeking to prove the existence of irresolvable dilemmas especially the argument from the incommensurability of values are discussed at length and refuted The book shows that though on the normative level dilemmas are resolved they typically involve a high moral cost for which there is no adequate compensation This moral cost is the source of the regret and pain suffered by agents in moral dilemmas Thus moral dilemmas do not point to any inconsistency in our moral reasoning or theory but to a problematic aspect of the human condition at times probably less often than is usually believed human beings are justified and even required to dirty their hands by behaving in ways that in ordinary situations would be strictly forbidden and condemned
