Nolas, 2024-10-11 This book is a comprehensive collection of the most influential papers on thermoelectricity published in the last two centuries. Starting with the pioneering work of Volta, Seebeck and Peltier on thermoelectric phenomena it takes the reader through a historical journey of articles and books that have shaped the field of thermoelectricity covering topics ranging from fundamental physics to novel materials. The book is annotated by a team of distinguished researchers from around the world and includes English translations of the earliest research reports on thermoelectricity many of which have never been made available before. This provides a unique opportunity to explore the scientific evolution of this groundbreaking discipline. Whether you are a seasoned expert or a newcomer to the field this book is an invaluable resource for understanding the rich history and current state of thermoelectricity research. Machine Learning and Immersive Technologies for User-centered Digital Healthcare Innovation Federico Colecchia, Eleonora Ceccaldi, Daniele Giunchi, Fang Wang, Rui Qin, 2025-06-09 Emerging technologies such as machine learning and immersive technologies including virtual reality and augmented reality hold great potential for driving disruptive healthcare innovation. However the adoption of digital technology in healthcare including use of data-driven tools in support of clinical decision making and patient-facing applications relying on consumer electronic devices is often hindered by issues of user experience trust equitability and fairness. There is increasing recognition of a need to facilitate further convergence between the development of emerging technologies and user-centered design research for healthcare with a view to achieving a positive impact on patients care professionals and the healthcare system. This article collection addresses current development trends relating to user-centered digital healthcare innovation based on machine learning and immersive technologies in order to identify opportunities associated with the deployment of new solutions in a range of environments including clinical domestic and educational settings and barriers to the adoption of technology by end users. A key aim is to identify opportunities for

strengthening interdisciplinary collaboration as well as methods of lowering barriers and overcoming obstacles for the benefit of patients care professionals and the healthcare system Examples of potential outcomes are effective design and use of solutions based on machine learning and immersive technologies to improve user experience strategies to facilitate ethical development of digital technology for healthcare and methods of encouraging adoption of advanced tools developed in line with principles of equitability and fairness Articles should address issues of user centered digital healthcare innovation driven by machine learning and immersive technologies Submissions should ideally be positioned at the intersection of digital technology development with user centered design although contributions more technical in nature as well as user experience studies are also welcome A non exhaustive list of suitable topics and manuscript types is given below Machine learning and or immersive technologies including augmented reality and virtual reality for user centered digital healthcare Clinical decision support systems Patient facing applications Tools for education and training of future medical professionals Potential barriers to adoption of technology issues of user experience trust equitability and fairness in digital healthcare Reviews and contributions discussing the development of intuitive accessible and inclusive digital interfaces All aspects of healthcare that are being or have the potential to be impacted by machine learning and immersive technologies At Home on an Unruly Planet Madeline Ostrander,2022-08-02 One of Kirkus Reviews 100 Best Nonfiction Books of 2022 A gold Nautilus Book Award winner Ecology Environment From rural Alaska to coastal Florida a vivid account of Americans working to protect the places they call home in an era of climate crisis How do we find a sense of home and rootedness in a time of unprecedented upheaval What happens when the seasons and rhythms in which we have built our lives go off kilter Once a distant forecast climate change is now reaching into the familiar threatening our basic safety and forcing us to reexamine who we are and how we live In At Home on an Unruly Planet science journalist Madeline Ostrander reflects on this crisis not as an abstract scientific or political problem but as a palpable force that is now affecting all of us at home She offers vivid accounts of people fighting to protect places they love from increasingly dangerous circumstances A firefighter works to rebuild her town after catastrophic western wildfires A Florida preservationist strives to protect one of North America s most historic cities from rising seas An urban farmer struggles to transform a California city plagued by fossil fuel disasters An Alaskan community heads for higher ground as its land erodes Ostrander pairs deeply reported stories of hard won optimism with lyrical essays on the strengths we need in an era of crisis The book is required reading for anyone who wants to make a home in the twenty first century Get Exam-ready for Engineering Science Hertzog Burger,2003 *Engineering Science* Tommy Ferreira,2012 **Engineering Science N2** Pieter Gerhardus Cloete Rousseau,2000 *Engineering Science N2* serves as a user friendly handbook both for the student and the lecturer in that it not only contains the complete theoretical component for every module but it also has a short revision section dealing with necessary material from the previous grade
