though so far only over a limited area A severe space weather event is not necessarily seen as a military problem in the first instance but it would be likely to meet the definition of an emergency under the Civil Contingencies Act 2004 and call for the help of the Armed Forces The reactive posture described by the Government appears somewhat complacent The Committee is very concerned that there appears to be no one Government Department identified to take immediate lead responsibility should there be a severe space weather event The Government must make clear exactly where lead responsibility in relation to EMP disturbances lies both nationally and within the MoD Defence alone cannot protect against the threat of EMP It must be a concern of the National Security Council and civil contingency planners with proper standards of protection developed with the vital service industries most at risk The effects of a High Altitude Electro Magnetic Pulse Event as a result of a nuclear weapon exploded at high altitude would be so serious that only government action could be expected to mitigate it Security of satellites is a matter of growing concern as our reliance upon such systems and the sheer number of satellites in orbit increase

ELECTROMAGNETIC COMPATIBILITY -WITHOUT EQUATIONS CHETAN KATHALAY,2019-04-18 This book deals with practical concepts of Electromagnetic Compatibility testing and design Given the scorching pace at which electronic gadgets are evolving deadlines associated with product design are shrinking rapidly In such a scenario the designer obviously has no time to read mathematical theory Keeping this fact in mind the book explains only the practical aspects of EMC design without resorting to equations or mathematical derivations whatsoever It has been designed in such a way that the designer can immediately incorporate EMC measures without worrying about the mathematics behind it The book starts with EMC fundamentals speaks about EMC standards and then goes on to explain various EMC test methodologies in detail In the subsequent chapters various design measures like filtering shielding grounding bonding PCB design and cable routing are discussed thoroughly These measures will enable manufacturers to design a compliant product at the design stage itself thereby saving time and money that would otherwise be required for costly retrofits once the design is frozen
