expanded coverage of international political economy *Diplomacy* Dr Dimitrios Kamsaris, 2020-03-04 International relations referred to the study of foreign affairs and political interaction between countries and cover the complex of cultural economic legal military and political relations of all countries and their populations actors and international organizations The goal of this book is to introduce some of the main issues of international politics such as war and peace development regional integration and security and to familiarize with different ways to conceptualise and analyse these issues This should allow to make a more confident decision about your own attitude towards particular issues and to analyse these issues more thoroughly but it should also make you question both your own as well as others representations of the world *The African Union* Omar Alieu Touray, 2016-12-01 This book offers a comprehensive analysis of the African Union during the organization's first ten years of existence It takes the reader through the various intergovernmental processes that preceded and followed the establishment of the Union and through the workings of key organs such as the Assembly of Heads of State the Council of Ministers the Pan African Parliament and the Commission The study argues that the African Union represented a rational choice of its member states who saw it as a means to advancing their individual and collective preferences for liberation peace and security good governance and socio economic development It maintains that the African Union did not only make marked progress in a number of areas the Union also established norms that had transformational effects on military and political elites at country and regional levels However like in most agent principal relations the autonomy of the Union was limited in many ways and this affected the Union's effectiveness in such areas as human and socio economic development as well as in sustaining peace support operations At a more general level the study argues that the African Union offers clear insights into integration as a multidimensional process that no single theoretical tradition can explain in a comprehensive manner The author's response to such a theoretical limitation is fusionism an integrated approach that amalgamates various analytical traditions in order to provide a better explanation of the processes of international integration The detailed analysis and bold proposals will undoubtedly make the study appealing not only to specialists in African Studies but equally to a broader spectrum of international relations and development scholars *Diplomatic Theory* Barry H. Steiner, 2018-03-16 This book is intended as a primer for generalizing on a case comparison basis about diplomatic statecraft including resources and techniques available to states to attain their objectives Twenty years in the making it employs an inductive method in which small samples of cases occurring at different times and between different states are studied to track and understand specific variable diplomatic behavior Its concern with empirically grounded generalization in which hypotheses are formulated and tested by case similarities and differences is a new approach to diplomatic analysis Diplomacy though central to international relations study and practice has generally been studied normatively rather than theoretically in contrast to other international relations topics Students of diplomacy emphasizing statecraft's complexity have generally shied away from theory while theory minded international relations analysts have neglected statecraft and highlighted

military capabilities and positional rivalries as determiners of state behavior This book instead builds diplomatic theory by investigating variation in case experience especially in the diplomatic choices made by states It shows that theorizing is enhanced by a diplomatic point of view and by distinguishing diplomatic behavior as cause and as effect **The Routledge Companion to Cross-Cultural Management** Nigel Holden, Snezhina Michailova, Susanne Tietze, 2015-04-24 This Routledge Companion provides a timely and authoritative overview of cross cultural management as an academic domain and field of practice for academics and students With contributions from over 60 authors from 20 countries the book is organised in to five thematic areas Review survey and critique Language and languages moving from the periphery to the core Cross cultural management research and education The new international business landscape Rethinking a multidisciplinary paradigm Edited by an international team of scholars and featuring contributions from a range of leading cross cultural management experts this prestigious volume represents the most comprehensive guide to the development and scope of cross cultural management as an academic discipline **U.S. Foreign Policy** Steven W. Hook, 2015-12-18 The same aspects of American government and society that propelled the United States to global primacy have also hampered its orderly and successful conduct of foreign policy This paradox challenges U S leaders to overcome threats to America s world power in the face of fast moving global developments and political upheavals at home The fully updated Fifth Edition of Steven W Hook s U S Foreign Policy The Paradox of World Power explores this paradox identifies its key sources and manifestations and considers its future implications as it asks whether U S foreign policymakers can manage these dynamics in a manner that preserves U S primacy *Understanding a Changing World* Donald R. Kelley, 2021-01-14 The world is becoming more complex fraught with increasing possibilities for conflict over national rivalries economic competition and cultural and ideological fault lines This clear eyed text offers a structured and theoretically grounded way to think about the forces that animate change and the alternative futures they may create Donald Kelley views both contemporary reality and the future we face through the perspective of four different paradigms that shape our way of thinking about the world The nation state paradigm built on the assumption that the traditional Westphalian nation state remains the key building block of the present and the future which leads us to predict the future in terms of the nature and alignment of nation states The economic paradigm built on the assumption that economic factors are increasingly important which leads us to see the future in terms of factors such as interdependence globalization and trade as well as the growing opposition to these developments and the prioritization of national economic needs The identity and culture paradigm built on the distinct identities and cultures of nations and regions which leads us to view the future in terms of conflicting culture based communities transcending formal national or economic interests The ideology paradigm based on a post cold war reemergence of ideological conflict within and among nations which leads us to view a world based on ideology based conflict From these paradigms and their interactions Kelley builds a series of possible alternative futures of the international system His framework provides a unique way of

looking at how and why the world is changing and the many different futures some peaceful and productive some warlike and destructive and others simply dysfunctional in which we might live *Gustavus v Wallenstein* John Pike, 2024-05-30 Explore the epic conflict and contrasting leadership styles of King Gustavus Adolphus of Sweden and Albrecht von Wallenstein Duke of Friedland two titanic figures in the Thirty Years War whose strategic brilliance and dramatic deaths shaped the course of modern warfare analyzed in vivid detail by the author The conflict personal rivalry and contrast in personality generalship and command between the two iconic commanders in the Thirty Years War King Gustavus Adolphus of Sweden for the Protestant powers and Albrecht von Wallenstein Duke of Friedland More than just commanders at the tactical level they were statesmen military organizers and strategists on a continental scale Both commanders represented the 17th century military revolution in action The writing is vivid graphic and detailed without overloading and readers can feel involved in the action from strategic planning to battlefield tactics and even the melee Both generals are titanic figures come and their respective deaths Gustavus heroically in battle and Wallenstein murdered with the Emperor's compliance were dramatic highpoints in the long war This is no hagiography and the author analyses the contrasting reputations of two of the greatest military figures in modern history and analyses mistakes as well their triumphs Both commanders understanding of the role of the modern state and finance as vital factors in the military revolution and modern warfare A major contrast was Gustavus's constant search for the tactical and strategic initiative compared to Wallenstein's caution and patience and development of counter punch defensive tactics Exceptional for the period a young warrior like an Alexander Gustavus excelled in inspired battlefield leadership even at huge risk Despite his death at Lutzen in 1632 he and his steadfast chancellor Oxenstierna had decisively defeated the Emperor's attempt to subjugate the Empire and introduce the Catholic counter reformation Gustavus contributed hugely to the ending of Habsburg supremacy while advancing new concepts in modern war His death ushered in his acolytes including generals Baner Saxe Weimar and Torstensson Gustavus or Wallenstein the greater of the two The reader must judge but Napoleon included Gustavus in his list of ten greats with Julius Caesar Hannibal Barca and Alexander the Great Multilateralism in the Indo-Pacific Swaran Singh, Reena Marwah, 2022-08-05 This book focuses on emerging new multilateralism in the Indo Pacific and offers a useful analysis of various existing and evolving formulations and alignments in the region The book problematises the evolution relevance and changing contours of emerging economic and security architectures and connects these to various unilateral and multilateral initiatives that undergird the overall transformation in these economic and strategic multilaterals in this region The chapters offer a comprehensive overview of organisations and institutions and the contributors provide their historical background and contemporary focus with implications for the future Consequently the book provides a balanced assessment of evolving trends elucidated by both its theoretical debates and empirical analyses It assesses the outline and influence of non traditional threats that have received only stand alone and not integrated examination involving issues as climate change piracy smuggling and terrorist activity
