Arms Control Robert E. Williams Jr., Paul R. Viotti, 2012-05-15 Set against a backdrop of terrorism, rogue states, non-conventional warfare and deteriorating diplomacy, this encyclopedia offers a comprehensive multidisciplinary up-to-date reference on the recent history and contemporary practice of arms control and nonproliferation. *Arms Control: History, Theory and Policy* features in-depth expert analysis and information on the full spectrum of issues relating to this critical topic. Noted experts provide a full spectrum of perspectives on arms control, offering insightful analysis of arms control agreements and the people and institutions behind them. Volume 1 provides an accessible historical overview of the subject and a more detailed conceptual analysis of the foundations of arms control. Volume 2 covers the contemporary and practical issues of arms control, focusing on global issues that arms control advocates have been forced to address with varying degrees of success: a burgeoning international trade in conventional weapons, a closely related flood of small arms and light weapons used to fuel intrastate conflicts and even genocide, and the spread of nuclear weapons to potentially unstable regions of the world.

Learning in Work Raymond Smith, 2018-04-11 This book explores and progresses the concept of negotiation as a means of describing and

explaining individuals learning in work It challenges the undertheorised and generic use of the concept in contemporary work learning research where the concept of negotiation is most often deployed as a taken for granted synonym for interaction co participation and collaboration and hence used to unproblematically account for workers learning as engagement in social activity Through a focus on workers personal practice and based on extensive longitudinal empirical research the book advances a conceptual framework The Three Dimensions of Negotiation to propose a more rigorous and work learning specific understanding of the concept of negotiation This framework enables workers personal work practices and their contributions to the personal organisational and occupational changes that evidence learning to be viewed as negotiations enacted and managed within contexts that are in turn sets of premediate and concurrent negotiations that frame the transformations on and from which on going negotiations of learning and practice ensue The book does not seek to supplant understandings of the rich and valuable concept of negotiation Rather it seeks to develop and promote a more explicit use of the concept as a socio personal learning concept at the same time as it opens alternative perspectives on its deployment as a metaphor for individual s learning in work
