The Education Triple Cocktail Brahm Fleisch, 2018-08-15 The Education Triple Cocktail brings together rigorous quantitative and qualitative research on a new approach to improving foundational teaching and learning for schoolchildren living in working class poor and remote rural communities in resource constrained systems like South Africa At the core of this book is the theory and evidence for a powerful new interlocking and mutually reinforcing change model Inspired by the AIDS treatment story the three pronged approach of structured daily lesson plans appropriate and high quality educational materials and one on one instructional coaching to help teachers transform their instructional practices in early grade classrooms shows that it will improve learning outcomes For education systems defined by low levels of early grade learning and profoundly unequal outcomes The Education Triple Cocktail offers a theoretically informed evidence based way forward This book will be of immense use to teachers students of Education policymakers and parents *Getting Skills Right: South Africa* OECD, 2017-07-10 This report identifies effective strategies to tackle skills imbalances in South Africa **Twenty Years of Education Transformation in Gauteng 1994 to 2014** Maringe, Felix, Prew, Martin, 2015-05-05 Twenty Years of Education Transformation in Gauteng 1994 to 2014 An Independent Review presents a collection of 15 important essays on different aspects of education in Gauteng since the advent of democracy in 1994 These essays talk to what a provincial education department does and how and why it does these things whether it be about policy resourcing or implementing projects Each essay is written by one or more specialist in the relevant focus area The book is written to be accessible to the general reader as well as being informative and an essential resource for the specialist reader It sheds light on aspects of how a provincial department operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years both nationally and provincially There has been no attempt to fit the book's chapters into a particular ideological or educational paradigm and as a result the reader will find differing views on various aspects of the Gauteng Department of Education's present and past We leave the reader to decide to what extent the GDE has fulfilled its educational mandate over the last 20 years *Knowledge, Curriculum and Equity* Brian Barrett, Ursula Hoadley, John Morgan, 2017-07-20 In 2008 the first in a series of symposia established a social realist case for knowledge as an alternative to the relativist tendencies of the constructivist post structuralist and postmodernist approaches dominant in the sociology of education The second symposium focused on curriculum and the development of a theoretical language grounded in social realism to talk about issues of knowledge and curriculum Finally the third symposium brought together researchers in a broad range of contexts to build on these ideas and arguments and with a concerted empirical focus bring these social realist ideas and arguments into conversation with data Knowledge Curriculum and Equity Social Realist Perspectives contains the work of the third symposium where the strengths and gaps in the social realist approach are identified and where there is critical recognition of the need to incrementally extend the theories through empirical study Fundamentally the problem that

social realism is seeking to address is about understanding the social conditions of knowledge production and exchange as well as its structuring in the curriculum and in pedagogy The central concern is with the on going social reproduction of inequality through schooling and exploring whether and how foregrounding specialised knowledge and its access holds the possibility for interrupting it This book consists of 13 chapters by different authors working in Oceania Asia Europe Africa and North America From very different vantage points the authors focus their theoretical and empirical sights on the assumptions about knowledge that underpin educational processes and the pursuit of more equitable schooling for all

Reconceptualising the Learning Crisis in Africa Kwame Akyeampong, Sean Higgins, 2025-06-16 This book offers a powerful post colonial rejection of the so called global learning crisis that offers deficit models of the experiences knowledges identities and relationships of African children eroding their agency and dignity and undermining their learning opportunities and potential Three case studies of three accelerated learning programmes ALPs for out of school and lower achieving children in Ethiopia Liberia and Ghana illustrate multi dimensional models that re envision the purposes and pedagogies of basic education reconnect with the lived experiences of African children and teachers and promote the role of communities in improving children s learning Drawing on diverse social theory the chapters reveal the use of children s funds of identity and knowledge a material engagement with their natural environment and highlight the transformative use of local languages This book ultimately proves that a holistic approach to learning based on the relational and community rooted African philosophy of Ubuntu produces vital personal and academic benefits for African children This book will be of great interest to academics researchers and postgraduate students in the fields of international and comparative education postcolonial studies African education education policy and transformative pedagogy It will also appeal to development strategists and NGOs working with the Education for All agenda *Annual Report* South Africa.
