The Oxford Handbook of Evidence-based Crime and Justice Policy Brandon Welsh, Steven N. Zane, Daniel P. Mears, 2024

An evidence based approach to crime and justice policy can go a long way toward ensuring that the best available research is considered in decisions that bear on the public good. However the term evidence based is characterized by a great deal of rhetoric. Indeed there remains a marked disjuncture between calls for evidence based policy and an understanding of what it means for policy to be evidence based. The calls for evidence based policy nonetheless provide a powerful foundation for propelling a movement toward bringing about rational cost effective and humane policies for the betterment of society. This handbook showcases the state of research on evidence based crime and justice policy and the challenges that impede its creation and use. The volume has three core objectives to promote new and productive ways to think about evidence based policy to demonstrate how research can contribute to and guide evidence based policy in juvenile justice criminal justice and alternatives to system responses and to identify strategies that can increase reliance on evidence based policy. To meet these objectives each chapter is guided by several central questions: What do we know about evidence based policy and practice in crime and justice? How can we improve knowledge of evidence based policy and practice? How can we promote more use of evidence based policy and practice? Taken as a whole the volume emphasizes the critical need for policies that are grounded in high quality research that address critical research gaps and that fully acknowledge the limitations of what extant research can do to inform policy decisions.
