Geometry Illustration Manual Mathematical Postscript:

Mathematical Illustrations, 1996 **Mathematical Illustrations** Bill Casselman, 2005-01-24 This practical introduction to the techniques needed to produce mathematical illustrations of high quality is suitable for anyone with a modest acquaintance with coordinate geometry The author combines a completely self contained step by step introduction to the graphics programming language PostScript with advice on what goes into good mathematical illustrations chapters showing how good graphics can be used to explain mathematics and a treatment of all the mathematics needed to make such illustrations The many small simple graphics projects can also be used in courses in geometry graphics or general mathematics Code for many of the illustrations is included and can be downloaded from the book's web site www.math.ubc.ca/cass/graphics/manual Mathematicians scientists engineers and even graphic designers seeking help in creating technical illustrations need look no further *Gazette - Australian Mathematical Society* Australian Mathematical Society, 2006

That's Maths Peter Lynch, 2016-10-14 From atom bombs to rebounding slinkies open your eyes to the mathematical magic in the everyday Mathematics isn't just for academics and scientists a fact meteorologist and blogger Peter Lynch has spent the past several years proving through his Irish Times newspaper column and blog That's Maths Here he shows how maths is all around us with chapters on the beautiful equations behind designing a good concert venue predicting the stock market and modelling the atom bomb as well as playful meditations on everything from coin stacking to cartography If you left school thinking maths was boring think again [Data Clustering in C++](#) Guojun Gan, 2011-03-28 Data clustering is a highly interdisciplinary field the goal of which is to divide a set of objects into homogeneous groups such that objects in the same group are similar and objects in different groups are quite distinct Thousands of theoretical papers and a number of books on data clustering have been published over the past 50 years However few books exist to teach people how to implement data clustering algorithms This book was written for anyone who wants to implement or improve their data clustering algorithms Using object oriented design and programming techniques Data Clustering in C exploits the commonalities of all data clustering algorithms to create a flexible set of reusable classes that simplifies the implementation of any data clustering algorithm Readers can follow the development of the base data clustering classes and several popular data clustering algorithms Additional topics such as data pre processing data visualization cluster visualization and cluster interpretation are briefly covered This book is divided into three parts Data Clustering and C Preliminaries A review of basic concepts of data clustering the unified modeling language object oriented programming in C and design patterns A C Data Clustering Framework The development of data clustering base classes Data Clustering Algorithms The implementation of several popular data clustering algorithms A key to learning a clustering algorithm is to implement and experiment the clustering algorithm Complete listings of classes examples unit test cases and GNU configuration files are included in the appendices of this book as well as in the downloadable resources The only requirements to compile the code are a modern C
