Higher Education in China Jianmin Gu, Xueping Li, Lihua Wang, 2018-09-29 This book offers international readers a comprehensive introduction to higher education in China and will help readers around the globe make sense of the huge and complex machinery that makes up the university and college sector in China today. It accompanies readers step by step allowing them to understand the most important aspects of this sector in China: its history and development, its scope and structure, its operational system and management, and its enrollment and employment processes. It also provides an overview of the various levels of higher education in China: namely, specialized higher education, undergraduate education, postgraduate education, research, and faculty. In short, the book will tell you what higher education in China is and how it works. While economic globalization and internationalization of higher education have greatly reduced the differences among educational systems in various countries, it cannot be denied that any given country's higher education system needs to be deeply rooted in its culture and traditions. In this book, we highlight several distinctive characteristics of higher education in China, including the ancient roots and modern history, massive scale, diversity, and centralized management and pragmatic trends.

Designing History in East Asian Textbooks Gotelind Mueller, 2011-02-01 This book analyses the efforts throughout East Asia to deploy education for purposes of political socialization and, in particular, in order to shape notions of identity. The chapters also examine the trend of common textbook initiatives which have recently emerged in East Asia with the aim of helping to defuse tensions arguably fuelled by existing practices of mutual misrepresentation. These are analysed in relation to the East Asian political context and compared with previous and ongoing endeavours in other parts of the world, particularly Europe, which have been keenly observed by East Asian practitioners. Written by a group of international education experts, the chapters discuss the enduring focus on the role of curricula in inculcating homogenous visions of the national self and indeed homogenized visions of significant others. Including contributions from scholars and curriculum developers involved personally in the writing of national and multi-national history textbooks, this book will be of interest to students and scholars of Asian education, Asian history, and comparative education studies. Gotelind Mueller is Professor of Chinese Studies, University of Heidelberg, Germany.
