Translation Title List and Cross Reference Guide U.S. Atomic Energy Commission,1965 [A User's Guide to BOMM](#) Sir Edward Bullard,F. E. Oglebay,Walter Heinrich Munk,Gaylord Riggs Miller,1966 BOMM is a system of programs which causes an electronic computer to perform arithmetic operations on time series In devising the system the main objectives were 1 to enable a wide variety of data formats to be accepted without recoding 2 to allow gross errors to be removed automatically from the data 3 to provide a considerable variety of arithmetic operations and leave the user free to choose the order in which they are applied and 4 to allow further processes to be incorporated into the system The present User's Guide provides the information needed by the user in operating the system More complete details including flow diagrams of the programs are given in a longer work entitled Manual of the BOMM System of Programs for the Reduction of Time Series *General Technical Report INT. ,1997* **Manual of Pharmacologic Calculations** Ronald J.

Tallarida,Rodney B. Murray,2012-12-06 This book contains a collection of quantitative procedures in common use in pharmacology and related disciplines It is intended for students and researchers in all fields who work with drugs Many physicians especially those concerned with clinical pharmacology will also find much that is useful The procedures included may be considered core since they are generally applicable to all classes of drugs Some of the procedures deal with statistics and hence have even wider application In this new edition we have increased the number of procedures from 33 in the first edition to 48 Other procedures have been revised and expanded Yet the basic philosophy of this new edition remains unchanged from the first That is the pharmacologic basis of each procedure is presented along with the necessary formulas and one or more worked examples An associated computer program is included for each procedure and its use is illustrated with the same worked example used in the text The discussions of theory and the sample computations are brief and self

contained so that all computations can be made with the aid of a pocket calculator and the statistical tables contained in Appendix A Yet it is realized that the proliferation of lower priced microcomputers is likely to mean that more and more readers will utilize a computer for most calculations Accordingly we have modified the format of the book to facilitate computer usage
