Navy Seabees *Building Leaders* West Point, 2011-07-01 The Leader's Character Dr. Gregory L. Cruell, 2023-02-28 The Department Of Defense Dictionary of Military and Associated Terms defines responsibility as the obligation to carry forward an assigned task to a successful conclusion With responsibility comes authority to direct and take the necessary action to ensure success Simply put the practicing and developing leader has the ability to respond This book is about the leader's responsibility to never stop reinforcing and developing character that people want to follow No organization is going to place someone in a position of responsibility without trusting or believing that the leader possesses the character and necessary ability for successful accomplishment of its most important task leading the organization's people **Military Leadership Lessons for Public Service** Charles Szypszak, 2016-10-11 Military veterans have had some of the most intensive leadership training available Many return to their communities seeking to apply what they have learned Those who enter the world of public affairs where colleagues are increasingly less likely to have served in the military may encounter a popular misconception that military leadership is all about exercising authority and giving orders In fact military leadership is based on interpersonal dynamics often learned through trying circumstances Effective management of civil emergencies as shown by 9/11 and Hurricane Katrina calls for the same official demeanor decisiveness and trustworthiness as does combat Good leadership is fundamentally the same in ordinary day to day challenges as well This book describes how the principles and methods of military leadership are effective for public service Instructors considering this book for use in a course may request an examination copy here **The Army Lawyer**, 2009 Professionalizing Leadership Barbara Kellerman, 2018-02-02 Over the last 40 years the leadership industry has grown exponentially Yet leadership education training and development still fall far short Moreover leaders are demeaned degraded and derided as they never were before Why The problem is leadership has stayed stuck It has remained an occupation instead of becoming a profession Unlike medicine and law leadership has no core curriculum considered essential It has no widely agreed on metric or criteria for qualification And it has no professional association to oversee the conduct of its members or assure minimum standards Professionalizing Leadership looks to a past in which learning to lead was the most important of eruditions It looks to a present in which learning to lead is as effortless as ubiquitous And it looks to a future in which learning to be a leader might look different altogether it might resemble the far more rigorous process of learning to be a doctor or a lawyer As it stands now the military is the only major American institution that gets it right It assumes leadership is a profession that requires those who practice it to be taught in accordance with high professional standards Barbara Kellerman draws on the military experience specifically to develop a template for learning how to lead generally Leadership in the first quarter of the present century is different from what it was even in the last quarter of the past century which is why leadership taught casually and carelessly should no longer suffice Professionalizing Leadership addresses precisely the problem of how to prepare leaders in accordance with professional norms It provides the template necessary for transforming leadership from dubious occupation
