At a recent meeting of the world's leading car manufacturers, the subject of safety was discussed. It was decided that the best way to improve car safety was to make the car's body more resistant to damage. This was done by using a new material called 'Kevlar'. This material is very strong and is used in many other products. It was also found that the car's body should be made of a material that is not as heavy as steel. This was done by using a new material called 'Carbon Fiber'. This material is very strong and is used in many other products.
