Question	Answer
1. What is the main purpose of the study?	The main purpose of the study is to investigate the effect of the new curriculum on the learning outcomes of the students in the primary school.
2. What is the research design?	The research design is a quasi-experimental design, which involves comparing the learning outcomes of the students who were taught using the new curriculum with those of the students who were taught using the old curriculum.
3. What are the independent and dependent variables?	The independent variable is the curriculum (new vs. old). The dependent variable is the learning outcome (score on the test).
4. What is the sample size?	The sample size is 60 students, who were divided into two groups of 30 students each.
5. What are the data collection instruments?	The data collection instruments are the test scores of the students, which were collected at the end of the semester.
6. What are the data analysis techniques?	The data analysis techniques are the mean, standard deviation, and t-test, which were used to compare the learning outcomes of the two groups.
7. What are the findings of the study?	The findings of the study are that the students who were taught using the new curriculum achieved significantly higher scores on the test than the students who were taught using the old curriculum.
8. What are the implications of the study?	The implications of the study are that the new curriculum is more effective than the old curriculum, and it should be implemented in all primary schools.
9. What are the limitations of the study?	The limitations of the study are that the sample size was small, and the study was conducted in a single school.
10. What are the suggestions for future research?	The suggestions for future research are to conduct a larger study with a more diverse sample, and to investigate the long-term effects of the new curriculum.

18. *Explain the importance of the following factors in the design of a control system:*

REMOTE CONTROL

	Question	Answer
1	What is the main purpose of the study?	The main purpose of the study is to investigate the effect of the independent variable on the dependent variable.
2	What is the research hypothesis?	The research hypothesis is that the independent variable has a positive effect on the dependent variable.
3	What is the independent variable?	The independent variable is the variable that is manipulated or controlled by the researcher.
4	What is the dependent variable?	The dependent variable is the variable that is measured or observed in the study.
5	What is the control group?	The control group is the group of subjects that does not receive the treatment or intervention.
6	What is the experimental group?	The experimental group is the group of subjects that receives the treatment or intervention.
7	What is the significance level?	The significance level is the probability of rejecting the null hypothesis when it is true.
8	What is the power of the study?	The power of the study is the probability of rejecting the null hypothesis when it is false.
9	What is the effect size?	The effect size is the magnitude of the effect of the independent variable on the dependent variable.
10	What is the conclusion of the study?	The conclusion of the study is that the independent variable has a positive effect on the dependent variable.
