- **Environmental Science**
Environmental Science is the study of the interactions between the physical, chemical, and biological components of the environment and the human population. It is a multidisciplinary field that draws on knowledge from biology, chemistry, physics, and earth science to understand the complex systems that make up our world. Environmental scientists work to identify the causes of environmental problems, assess the risks they pose, and develop strategies to mitigate them. They may work in government agencies, research institutions, or the private sector.
- **Environmental Engineering**
Environmental Engineering is the application of engineering principles to the design and development of systems that protect the environment. Environmental engineers work to develop and implement technologies that reduce pollution, conserve resources, and improve the quality of the environment.
