Deadly Force Tom S. Clark, Adam N. Glynn, Michael Leo Owens, 2025-06-03 A groundbreaking study of when where and whom police shoot in America's largest cities Police shootings in America spark outrage and protest and raise questions about police use of lethal force Yet despite the attention given to high profile shootings it is extremely difficult to draw wider conclusions about the frequency and outcomes of police gunfire because there is no systematic and centralized source of information on these incidents This pioneering book draws on original data compiled by the authors to examine police shootings both fatal and non fatal in hundreds of American cities It documents racial disparities in shooting incidents and shows that the media spotlight on the most shocking fatal shootings tell only part of the story of police gunfire in our cities The authors find that there are patterns in when where and whom the police shoot and they present strong evidence of unjustifiable disparities It's not just that young unarmed Black men are disproportionately subjected to gunfire during encounters with police officers there is also a disproportionate concentration of shootings in the places where most Black and Hispanic urbanites live even accounting for violent crime rates and other factors As a consequence Black and Hispanic residents of large cities are disproportionately exposed to police gunfire even when they are not themselves the targets of it The authors offer other insights as well exploring the connection between police department funding and rates of shootings and considering the influence of a city's political leadership on police use of gunfire It is only through a deeper understanding of police shootings the authors argue that we can reduce their incidence and make effective reform possible

Institution for examination where they would land on the desk of the only person in the world equipped to make sense of it all Her name was Roxie Laybourne a diminutive but singular woman with thick glasses a heavy Carolina drawl and a passion for birds Roxie didn't know it at the time but that box full of dead birds marked the start of a remarkable scientific journey She became the world's first forensic ornithologist investigating a range of crimes and calamities on behalf of the FBI the US Air Force and even NASA The Feather Detective takes readers deep within the vaunted backrooms of the Smithsonian's National Museum of Natural History to tell the story of a burgeoning science and the enigmatic woman who pioneered it While her male colleagues in taxidermy embarked on expeditions around the world and got plum promotions Roxie stayed with her birds Using nothing more than her microscope and bits of feathers she helped prosecute murderers kidnappers and poachers When she wasn't testifying in court or studying evidence from capital crimes she was helping aerospace engineers and Air Force crews as they raced to bird proof their airplanes before disaster struck again In The Feather Detective award winning journalist Chris Sweeney charts the astonishing life and work of this overlooked pioneer Once divorced once widowed and sometimes surly Roxie shattered stereotypes and pushed boundaries Her story is one of persistence and grit obsession and ingenuity Drawing on reams of archival material court documents and exclusive interviews Sweeney delivers a moving and amusing portrait of a woman who overcame cultural and scientific obstacles at every turn forever changing our understanding of birds and the feathers they leave behind
