James Joseph Sylvester Karen Hunger Parshall, 2013-01-10 In the folklore of mathematics James Joseph Sylvester 1814 1897 is the eccentric hot tempered sword cane wielding nineteenth century British Jew who together with the taciturn Arthur Cayley developed a theory and language of invariants that then died spectacularly in the 1890s as a result of David Hilbert's groundbreaking modern techniques This like all folklore has some grounding in fact but owes much to fiction The present volume brings together for the first time 140 letters from Sylvester's correspondence in an effort to establish the true picture It reveals through the letters as well as through the detailed mathematical and historical commentary accompanying them Sylvester the friend man of principle mathematician poet professor scientific activist social observer traveller It also provides a detailed look at Sylvester's thoughts and thought processes as it shows him acting in both personal and professional spheres over the course of his eighty two year life The Sylvester who emerges from this analysis unlike the Sylvester of the folkloric caricature offers deep insight into the development of the technical and social structures of mathematics
