Making Global Value Chains Work for Development Daria Taglioni, Deborah Winkler, 2016-06-10 Economic technological and political shifts as well as changing business strategies have driven firms to unbundle production processes and disperse them across countries Thanks to these changes developing countries can now increase their participation in global value chains GVCs and thus become more competitive in agriculture manufacturing and services This is a paradigm shift from the 20th century when countries had to build the entire supply chain domestically to become competitive internationally For policymakers the focus is on boosting domestic value added and improving access to resources and technology while advancing development goals However participating in global value chains does not automatically improve living standards and social conditions in a

country This requires not only improving the quality and quantity of production factors and redressing market failures but also engineering equitable distributions of opportunities and outcomes including employment wages work conditions economic rights gender equality economic security and protecting the environment The internationalization of production processes helps with very few of these development challenges Following this perspective Making Global Value Chains Work for Development offers a strategic framework analytical tools and policy options to address this challenge The book conceptualizes GVCs and makes it easier for policymakers and practitioners to discuss them and their implications for development It shows why GVCs require fresh thinking it serves as a repository of analytical tools and it proposes a strategic framework to guide policymakers in identifying the key objectives of GVC participation and in selecting suitable economic strategies to achieve them *The Oil and Gas Journal* ,1929

Clearinghouse Review ,1994 *Iraqi Kurdistan, the PKK and International Relations* Hannes Černý, 2017-07-28 Due to its primacy in explaining issues of war and peace in the international arena the discipline of International Relations IR looms large in analyses of and responses to ethnic conflict in academia politics and popular media in particular with respect to contemporary conflicts in the Middle East Grounded in constitutive theory this book challenges how ethnic ethno nationalist conflict is represented in explanatory IR by deconstructing its most prominent state centric models frameworks and analytical concepts As much a critique of contemporary scholarship on Kurdish ethno nationalism as a detailed analysis of the most prominent Kurdish ethno nationalist actors the book provides the first in depth investigation into the relations between the PKK and the main Iraqi Kurdish political parties from the 1980s to the present It situates this inquiry within the wider context of the ambiguous political status of the Kurdistan Region of Iraq its relations with Turkey and the role Kurdish parties and insurgencies play in the war against ISIS in Iraq and Syria Appreciating these complex dynamics and how they

are portrayed in Western scholarship is essential for understanding current developments in the Iraqi and Syrian theatres of war and for making sense of discussions about a potential independent Kurdish state to emerge in Iraq. *Iraqi Kurdistan* provides a comprehensive and critical discussion of the state centric and essentialising epistemologies, ontologies and methodologies of the three main paradigms of explanatory IR as well as their analytical models and frameworks on ethnic identity and conflict in the Middle East and beyond. It will therefore be a valuable resource for anyone studying ethnicity and nationalism. *International Relations or Middle East Politics* *Metal Sustainability* Reed M. After decades of denial, oppression and conflict, Kurds now assert a more confident presence in Turkey's politics, but does increasing visibility mean a rejection of Turkey? Recording Kurdish voices from Istanbul and Diyarbakir, Turkey's most important Kurdish populated cities, this book generates new understandings of Kurdish identity and political aspirations. Highlighting elements of Kurdish identity including Newroz, the Kurdish language, connections to religion, landscape and cross border ties, it offers a portrait of Kurdish political life in a Turkey increasingly dominated by its president Recep Tayyip Erdogan. Within the context of Turkey's troubled trajectory towards democratisation, it documents Kurdish narratives of oppression and resistance and enquires how Kurds reconcile their distinct ethnic identity and citizenship in modern Turkey. *The Political Economy of the Kurds of*

Empires of Eurasia Jeffrey Mankoff,2022-04-19 How the collapse of empires helps explain the efforts of China Iran Russia and Turkey to challenge the international order This is a must read to understand the backstory of conflicts from Crimea to Xinjiang Fiona Hill author of *There Is Nothing for You Here* Eurasia's major powers China Iran Russia and Turkey increasingly intervene across their borders while seeking to pull their smaller neighbors more firmly into their respective orbits While analysts have focused on the role of leaders such as Vladimir Putin and Recep Tayyip Erdoğan in explaining this drive to dominate neighbors and pull away from the Western dominated international system they have paid less attention to the role of imperial legacies Jeffrey Mankoff argues that what unites these contemporary Eurasian powers is their status as heirs to vast terrestrial empires whose collapse left all four states deeply entangled with the lands and peoples along their peripheries but outside their formal borders Today they have all found new opportunities to project power within and beyond their borders in patterns shaped by their respective imperial pasts

How did the Turkish Kurdish Conflict arise Why have Turks and Kurds failed for so long to solve it How can they solve it today How can social scientists better analyze this and other protracted conflicts and propose better prescriptions for sustainable peace Return to Point Zero develops a novel framework for analyzing the historical structural and contemporary causes of ethnic national conflicts highlighting an understudied dimension politics Murat Somer argues that intramajority group politics rather than majority minority differences better explains ethnic national conflicts Hence the political ideological divisions among Turks are the key to understanding the Turkish Kurdish Conflict though it was nationalism that produced the Kurdish Question during late Ottoman imperial modernization political elite decisions by the Turks created the Kurdish Conflict during the postimperial nation state building Today ideational rigidities reinforce the conflict Analyzing this conflict from premodern times to today Somer emphasizes two distinct periods the formative era of 1918 1926 and the post 2011 reformative period Somer argues that during the formative era political elites inadequately addressed three fundamental dilemmas of security identity and cooperation and includes a discussion of how the legacy of those political elite decisions impacted and framed peace attempts that have failed in the 1990s and 2010s Return to Point Zero develops new concepts to analyze conflicts and concrete conflict resolution proposals **Urban Health in Africa** Elaine O.
