and tips are included **Handbook of Network and System Administration** Jan Bergstra, Mark Burgess, 2011-08-11

System administration is about the design, running and maintenance of human computer systems. Examples of human computer systems include business enterprises, service institutions and any extensive machinery that is operated by or interacts with human beings. System administration is often thought of as the technological side of a system: the architecture, construction and optimization of the collaborating parts, but it also occasionally touches on softer factors such as user assistance, help desks, ethical considerations in deploying a system and the larger implications of its design for others who come into contact with it. This book summarizes the state of research and practice in this emerging field of network and system administration in an anthology of chapters written by the top academics in the field. The authors include members of the IST EMANICS Network of Excellence in Network Management. This book will be a valuable reference work for researchers and senior system managers wanting to understand the essentials of system administration, whether in practical application of a data center or in the design of new systems and data centers. Covers data center planning and design. Discusses configuration management. Illustrates business modeling and system administration. Provides the latest theoretical developments.

Microsoft Exchange Server 2007: Tony Redmond's Guide to Successful Implementation Tony Redmond, 2011-04-08

Microsoft Exchange Server 2007 marks the biggest advancement in the history of the Exchange Product group. The completely re-engineered server system will change the face of how IT administrators approach Exchange. Tony Redmond, one of the world's most acclaimed Exchange experts, offers insider insight from the very basics of the newly transformed architecture to understanding the nuances of the new and improved Microsoft Management Console MMC 3.0 and the two new administrative interfaces: the Exchange Management Console (EMC) and the Exchange Management Shell (EMS). How Exchange works with Active Directory. How the new management model works. How to use the Exchange Management Shell to automate administrative operations. How Outlook, Outlook Web Access and Windows Mobile clients work with Exchange. How Exchange 2007 message routing differs from previous versions. How to help your users to use Exchange intelligently. How to select hardware for Exchange 2007.

The IBM TS4500 TS4500 tape library is a next generation tape solution that offers higher storage density and better integrated management than previous solutions. This IBM Redbooks publication gives you a close up view of the new IBM TS4500 tape library. In the TS4500, IBM delivers the density that today's and tomorrow's data growth requires. It has the cost effectiveness and the manageability to grow with business data needs while you preserve investments in IBM tape library products. Now you can achieve a low per terabyte cost and high density with up to 13 PB of data up to 39 PB compressed in a single 10 square foot library by using LTO Ultrium 9 cartridges or 11 PB with 3592 cartridges. The TS4500 offers the following benefits: Support of

the IBM Linear Tape Open LTO Ultrium 9 tape drive Store up to 1 04 EB 2 5 1 compressed per library with IBM LTO 9 cartridges High availability Dual active accessors with integrated service bays reduce inactive service space by 40% The Elastic Capacity option can be used to eliminate inactive service space Flexibility to grow The TS4500 library can grow from the right side and the left side of the first L frame because models can be placed in any active position Increased capacity The TS4500 can grow from a single L frame up to another 17 expansion frames with a capacity of over 23 000 cartridges High density HD generation 1 frames from the TS3500 library can be redeployed in a TS4500 Capacity on demand CoD CoD is supported through entry level intermediate and base capacity configurations Advanced Library Management System ALMS ALMS supports dynamic storage management which enables users to create and change logical libraries and configure any drive for any logical library Support for IBM TS1160 while also supporting TS1155 TS1150 and TS1140 tape drive The TS1160 gives organizations an easy way to deliver fast access to data improve security and provide long term retention all at a lower cost than disk solutions The TS1160 offers high performance flexible data storage with support for data encryption Also this enhanced fifth generation drive can help protect investments in tape automation by offering compatibility with existing automation Store up to 1 05 EB 3 1 compressed per library with IBM 3592 cartridges Integrated TS7700 back end Fibre Channel FC switches are available Up to four library managed encryption LME key paths per logical library are available This book describes the TS4500 components feature codes specifications supported tape drives encryption new integrated management console IMC command line interface CLI and REST over SCSI RoS to obtain status information about library components You learn how to accomplish the following tasks Improve storage density with increased expansion frame capacity up to 2 4 times and support 33% more tape drives per frame
