Human Development SG **Building Early Social and Emotional Relationships with Infants and Toddlers** Amanda Sheffield Morris, Amy C. Williamson, 2019-02-09 This book provides a comprehensive overview of the process of building healthy early social and emotional relationships with infants from a developmental perspective. The book synthesizes current research on the contextual influences of attachment, family relationships, and caregiving practices on social-emotional development. Chapters examine the processes of socioemotional development, particularly in relationships with parents, other family members, and peers, and identify areas for promoting healthy attachments and resilience, improving caregiving skills, and intervening in traumatic and stressful situations. Chapters also present empirically supported intervention and prevention programs focused on building early relationships from birth through three years of age. The book concludes with future directions for supporting infant mental health and its vital importance as a component of research, clinical and educational practice, and child and family policy. Topics featured in this book include: The effect of prenatal and neonatal attachment on social and emotional development; The impact of primary relationships and early experiences in toddlerhood; Toddler autonomy and peer awareness in the context of families and child care; Supporting early social and emotional relationships through The Legacy for Children™ Intervention; How to build early relationship programming across various cultures. **Building Early Social and Emotional Relationships with Infants and Toddlers** is a must-have reference for researchers, clinicians, and professionals and graduate students in the fields of infant mental health, developmental psychology, pediatrics, public health, family studies, and early childhood education.

Culturally Responsive Teaching for Infants and Toddlers Marie L. Masterson, 2025 This book presents an expanded view of infant and toddler development to equip educators with the knowledge, dispositions, and skills to create high-quality settings and interactions so that every child can have the best start in life. Readers are encouraged to consider the perspective of the child: What does this classroom, this teacher, and this experience look like and feel like to each child? How do teachers develop deeper understanding of development and learning in the context of children's families, cultures, and lives, and apply this knowledge to teaching decisions? Each chapter offers resources, research, teaching tips, activities to empower children, and questions for reflection and discussion. This book addresses the need for cultural safety and coherence between families and programs; the need for rich language and learning opportunities throughout the day; strategies for observing children and using this information to design curriculum; individualized interactions to facilitate play-based learning; and teaching strategies that strengthen each child's emerging skills and capabilities. **Book Features:** Shows how cultural beliefs, child-rearing practices, and language are active prime movers in infant and toddler teaching decisions and must be made visible through reflective practice; Illustrates insightful and caring strategies for building authentic relationships with families to guide planning and decision making; Applies NAEYC's developmentally appropriate practice position statement (2020) to the complex challenges encountered by teachers working with infants and toddlers and their families; Reimagines teaching through the lens of collaboration and creative thinking.
