Green, 2011-07-18 The textbook of choice for trainees and practitioners in haematology Over five editions Postgraduate Haematology has built a reputation as an extremely practical user friendly reliable source of information for examination preparation and clinical practice Completely revised to reflect the latest research in the field this edition continues to provide trainees with up to date knowledge on the pathogenesis clinical and laboratory features and management of blood disorders It covers the significant advances which have occurred in the application of cytogenetics and molecular genetics in the diagnosis classification and understanding of haematological disorders Coupled with the expertise of 34 new contributors from across Europe the editors have been joined by Professor Anthony Green from the University of Cambridge and they have reorganised the book into 52 accessible chapters Postgraduate Haematology is richly illustrated throughout with over 450 colour illustrations including line drawings photomicrographs of blood cells and tissues and algorithms to help aid treatment decision making It is an indispensable resource for trainees and an essential read for all specialists who are interested in updating their knowledge Companion resources site for this book www.wiley.com/go/hoffbrand/postgraduate with Figures and tables from the book for downloading Interactive multiple choice questions **The Essentials of hematology** Palisade Manufacturing Co. (Yonkers, N.Y.), 1900 Diagnostic Hematology Norman Beck, 2008-12-19 The approach described in this book is different from that in most student texts and has been very successful in practice starting almost from scratch but omitting many of the basics such as the details of hematopoiesis laboratory technology and so on which are hardly relevant to the practising clinician and student in the wards and are primarily of interest to the

hematologist and sometimes to the clinical specialist Considerable emphasis is given to the clinical history and examination and the interpretation of the clinical patterns thus exposed Hopefully it will overcome many of the traditional problems experienced in practical diagnostic haematology
