## Ethiopian Grade 10 Math Textbooks:

**Education Sector Plans and their Implementation in Developing Countries** Roy Carr-Hill, 2023-03-09 This book examines the factors affecting the successful implementation of Education Sector Plans in developing countries. It provides a detailed comparison that draws on data from 27 countries to offer careful research conclusions and policy recommendations. Offering a detailed comparison of the schooling situation e.g. availability of potable water and toilets provision for the disabled as well as educational outcomes both test scores and percentages out of school from the 27 countries using empirical evidence, the book examines the resources that have been invested in different education sectors, investigating the development and success of each plan. The volume uses correlation analysis to compare factors including the availability of government funding, national characteristics, ministerial decisions, influences of country and donor stakeholders as well as district and school level issues. Thorough comparative analysis of the data is then demonstrated with two measures of achievements to identify which factors can be considered as the most important in order to reach realistic policy and research conclusions. Timely and engaging, this book will be of great interest to researchers, scholars, and postgraduate students in the field of education and international development, comparative education, and international education more broadly.
