

FORD FAIRLANE FALCON MUSTANG COUGAR COMET MERCURY OPERATING INSTRUCTIONS

BAND SELECTOR

OFF-ON SWITCH

The lower left knob is the off-on switch and volume control. Turn the switch and volume control. Turn the radio on by rotating this knob clockwise. Continue rotating the knob clockwise to increase volume. Turning the knob counterclockwise decreases volume and turns the radio off.

TONE CONTROL

The left drag knob located behind the volume knob controls the tone of the radio. Turning the drag knob clockwise increases the treble range and counterclockwise increases the bass range.

STATION SELECTION

Station selection is controlled by five push buttons and a manual tuning control (center right knob). The push buttons are unique in that they can be pre-set to five AM stations and five FM stations, at the same time, for a total of 10 stations.

BAND SELECTOR SWITCH

The AM or FM band is selected by a slide-bar band selector. Slide the bar to the left for AM operation and to the right for FM operation.

BAND INDICATION

The slide-bar band selector covers the letters FM to the left of the slide-bar when the bar is moved to the right for FM operation. The letters AM appear at the right of the bar when it is moved to the left for AM operation.

STEREO BALANCE CONTROL

The right drag knob located behind the manual tuning knob controls the left to right balance of sound. This control is normally set approximately at center.

FRONT TO REAR SPEAKER CONTROL

On models with optional dual rear speakers, a front to rear speaker control is provided on the instrument panel to balance the level between the front and rear speakers. On Ford and Mercury, the control is located to the right of the steering column while on Fairlane, Falcon and Comet, the control is located to the left of the steering column.

STEREO INDICATOR LIGHT

An antenna stereo indicator light is located on the radio dial. This indicator light automatically signals the reception of an FM multiplex stereo station and automatically switches the receiver to stereo operation. This indicator light remains on during the reception of non-stereo (monaural) stations.

MANUAL TUNING

1 AM Stations . . . Position the band selector switch to the AM position. Rotate the manual tuning knob in either direction to tune to the desired station.

2 FM Stations . . . Extend the antenna to a height of approximately 33 inches. Position the band selector switch to the FM position. Rotate the manual tuning knob in either direction until the desired station comes in. (Carefully adjust the manual tuning knob for minimum noise.) When driving away from a station, it may be necessary to return the radio for minimum noise as the signal becomes weaker. When the fringe area is reached and the station can no longer be heard without excessive noise or "fading," it is necessary to return to a stronger station.
