*Friedland/Relyea Environmental Science for AP** Andrew Friedland, Rick Relyea, David Courard-Hauri, 2011-02-15

Friedland Relyea Environmental Science for AP was specifically developed to meet the requirements of the AP Environmental Science course and the needs of its students and teachers. This highly anticipated new textbook explores the science behind environmental science and involves students with the fundamental concepts and findings that inform environmental decision making at all levels from personal choices to national and international policy. This site will be the source for periodic updates on this exciting project as it draws closer to publication. For the latest developments or if you would like to be a part of this project as a reviewer or class tester, please contact Carlise Stembridge [Environment](#). Peter H. Raven, Linda R. Berg, David M. Hassenzahl, 2012-12-17. Raven's 8th edition of *Environment* offers more detailed content than the *Visualizing* text for a better understanding and integration of the core environmental systems and to view and analyze the role those systems play. Shorter but still comprehensive coverage focuses on ethical decision making and key local environmental science issues requiring readers to think critically about the course material outside of the classroom. Other features include brief text in the comprehensive segment, extensive chapter pedagogy to help reinforce the systems approach, more opportunities to think critically about how systems intersect and fit together, and new data interpretation questions at the end of each chapter.
