It provides guidance on the best methods identified to date for building the various components that implement solutions such as handling MQ based message flows or creating authentication and authorization policies. The information and recommendations in this publication are the result of real world experiences using the appliances. Such experience shows that taking the time to plan a solution implementation before beginning the work yields the greatest savings in time and energy and the highest quality outcome. This publication begins with a checklist of items to consider when planning a DataPower solution. This publication is intended to provide answers or guidance to implementation problems often encountered by users of the appliance. This book is not intended to present complete solutions or templates because experience shows that every customer uses the appliance in their own unique environment with unique requirements. Thus this publication provides a compendium of information about particular aspects of a solution. Use the Table of Contents or Index to find your current issue and return to this publication when the next issue or question arises.
