Gauteng 2014 Life Sciences Trial Memo:

International Conference for Innovation in Biomedical Engineering and Life Sciences Fatimah Ibrahim, Juliana Usman, Mas Sahidayana Mohktar, Mohd Yazed Ahmad, 2015-11-26 This volume presents the proceedings of ICIBEL 2015 organized by the Centre for Innovation in Medical Engineering CIME under Innovative Technology Research Cluster University of Malaya. It was held in Kuala Lumpur, Malaysia, from 6-8 December 2015. The ICIBEL 2015 conference promotes the latest researches and developments related to the integration of the Engineering technology in medical fields and life sciences. This includes the latest innovations, research trends and concerns, challenges and adopted solutions in the field of medical engineering and life sciences. Brief Interventions for Risky Drinkers Antoni Gual, Peter Anderson, Hugo López-Pelayo, Jillian Reynolds, 2016-06-29 Alcohol is the sixth leading risk factor for disability and premature death all over the world and one of the leading causes of premature mortality in western societies. It is a leading risk factor for death in young and middle age males. Heavy drinking accounts for about two thirds of the burden of disease attributable to alcohol. In the early 1980s screening and brief interventions (SBI) in primary health care settings were proposed as effective strategies to identify risky drinkers and to help them reduce their drinking. Since then a growing body of evidence including several meta analysis and Cochrane reviews has shown the efficacy and effectiveness of SBI in primary health settings. However demonstrating the effectiveness of SBI has not been insufficient to facilitate its general implementation in the routines of primary health care physicians and in fact the dissemination of SBI has proven to be a difficult business. Qualitative and quantitative research has identified most of the facilitators and barriers for its implementation and publicly funded research has been earmarked to address the dissemination problems worldwide. Some examples are the World Health Organization Phase III and Phase IV studies on the identification and management of alcohol related problems in primary care, EU funded projects PHEPA, AMPHORA, ODHIN, BISTAIRS, the UK SIPS trials and the SBIRT developments sponsored by the Substance Abuse. What length should they be? Is there a need for booster sessions? Is there added value of a motivational approach? These questions together with other relevant aspects of SBI need ongoing research. In recent years SBIs have been tested in settings other than primary health care including hospitals, accident and emergency rooms, criminal justice, colleges and universities, social services and pharmacies. In some of those areas the evidence is scarce, for example pharmacies, while in others it is very promising, for example students and hospitals. New technologies have also offered the possibility of online tools and in the last few years different digital based applications have been tested successfully as new ways to deliver effective SBIs to larger amounts of people. Brief interventions have also spread to drugs other than alcohol. This book aims to be an update of the state of the art of brief advice. It is a compilation of articles published by some of the most relevant researchers in the field in *Frontiers in Psychiatry* between 2014 and 2016. Statistical Learning and Data Sciences Alexander Gammerman, Vladimir Vovk, Harris Papadopoulos, 2015-04-02 This book constitutes the refereed proceedings of the

Third International Symposium on Statistical Learning and Data Sciences SLDS 2015 held in Egham Surrey UK April 2015
The 36 revised full papers presented together with 2 invited papers were carefully reviewed and selected from 59 submissions The papers are organized in topical sections on statistical learning and its applications conformal prediction and its applications new frontiers in data analysis for nuclear fusion and geometric data analysis
